## HOWARD REINA

Guide du voyageur à Genève et aux environs Lulu.com

The present volume looks at the relation between travel writing and cultural memory from a variety of perspectives, ranging from theoretical concerns with genres and conventions to detailed analyses of single texts. As befits the topic, the contributions roam far and wide, both geographically and historically. Some detail early Portuguese voyages of discovery, particularly to the East. Others depict encounters between Early, and not so early, Modern Western travelers and their Other interlocutors. Still others focus on travel writings as literature. Voyages and voyaging in literature form the subject of the last category of essays gathered here. Amongst the authors discussed are Fernão Mendes Pinto, Jean de Sponde, Furtado de Mendonça, Sor Juana Inéz de la Cruz, Elsa Morante, Ingeborg Bachmann, Sophia Andresen, Paul Claudel, Graham Greene, Valéry Larbaud, David Mourão-Ferreira, J.M.G. le Clézio, José Saramago, Michel Leiris, and Claude Lévi-Strauss. The volume concludes with an essay by the French-Lebanese author Salah Stétié.

The Chateaux of the Loire BoD - Books on Demand

This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.
