The Good Friday Agreement resulted in the cessation of paramilitary violence in Northern Ireland. However, prejudice and animosity between Protestants and Catholics remains. The Real Peace Process draws on extensive fieldwork in Protestant and Catholic churches across Ireland to analyse how Christian worship can become caught up in sectarianism. The book examines the need for a peace process that changes hearts and minds and not merely civic structures of their inhabitants. Aspects of everyday worship – ranging from the spatial and symbolic to the verbal, musical and interpersonal – are explored as the means by which sectarianism can be challenged and transformed.

The world we live in is constantly changing. Climate change, transforming gender conceptions, emerging issues of food consumption, novel forms of family life and technological developments are altering central areas of our forms of life. This raises questions of how to cope with and understand the moral changes implicit in such alterations. This volume is the first to address moral change as such. It brings together anthropologists and philosophers to discuss how to study and theorize the change of norms, concepts, emotions, moral frameworks and forms of personhood.

Ever since Bessie Smith's powerful voice conspired with the "race records" industry to make her a star in the 1920s, African American writers have memorialized the sounds and theorized the politics of black women's singing. In *Black Resonance*, Emily J. Lordi analyzes writings by Richard Wright, Ralph Ellison, James Baldwin, Gayl Jones, and Nikki Giovanni that engage such iconic singers as Bessie Smith, Billie Holiday, Mahalia Jackson, and Aretha Franklin. Focusing on two generations of artists from the 1920s to the 1970s, *Black Resonance* reveals a musical-literary tradition in which singers and writers, faced with similar challenges and harboring similar aims, developed comparable expressive techniques. Drawing together such seemingly disparate works as Bessie Smith's blues and Richard Wright's neglected film of *Native Son*, Mahalia Jackson's gospel music and Ralph Ellison's *Invisible Man*, each chapter pairs one writer with one singer to crystallize the artistic practice they share: lyricism, sincerity, understatement, haunting, and the creation of a signature voice. In the process, Lordi demonstrates that popular female singers are not passive muses with raw, natural, or ineffable talent. Rather, they are experimental artists who innovate black expressive possibilities right alongside their literary peers. The first study of black music and literature to centralize the music of black women, *Black Resonance* offers new ways of reading and hearing some of the twentieth century's most beloved and challenging voices.

Written by eleven leading anthropologists from around the world, this volume extends the insights of Fredrik Barth, one of the most important anthropologists of the twentieth century, to push even further at the frontiers of anthropology and honor his memory. As a collection, the chapters thus expand Barth's pioneering work on values, further develop his insights on human agency and its potential creativity, as well as continuing to develop the relevance for his work as a way of thinking about and beyond the state. The work is grounded on his insistence that theory should grow only from observed life.

The Resonance Effect is both the author's story of her inspirational journey of having the courage to find her true calling and an account of the development of a remarkable newly rediscovered treatment, frequency specific microcurrent (FSM), that takes advantage of the body's ability to respond to frequencies in order to heal a number of chronic conditions. Carolyn McMakin, a chiropractor specializing in fibromyalgia and myofascial pain, describes her experience using a two-channel microcurrent device that has achieved astounding results that have changed medicine and created new possibilities for suffering patients over the past twenty years. Nerve pain, fibromyalgia, diabetic neuropathies, muscle pain, athletic performance, injury repair, joint pain, low back pain, neck pain, kidney stone pain, the kidney stones themselves, liver disease, diabetic wounds, brain and spinal cord injuries, PTSD, depression, shingles, asthma, ovarian cysts, abdominal adhesions, and scarring all respond to specific frequencies. McMakin explains that results are predictable, reproducible, and teachable—all without side effects—offering hope and healing to millions of people. McMakin tells the story of how thousands of patients with conditions that did not respond to other medical therapies recovered from pain and disability through the non-invasive treatment that she developed. For example, asthma resolves with specific frequencies that remove inflammation, allergy reaction, and spasm from the bronchi. One frequency combination eliminates shingles pain in minutes and stops the shingles attack with a single three-hour treatment. Since 2005, a series of frequencies has been used to treat hundreds of PTSD patients. Post-surgical patients use FSM to reduce pain, prevent bruising, and increase healing. NFL, NHL, and Olympic athletes use it to heal injuries and improve performance. McMakin includes case histories that illustrate the efficacy of the treatment and shares the specific frequencies that each condition requires so that patients direct their own treatments.

The blockbuster best seller *Primal Leadership* introduced us to "resonant" leaders--individuals who manage their own and others' emotions in ways that drive success. Leaders everywhere recognized the validity of resonant leadership, but struggled with how to achieve and sustain resonance amid the relentless demands of work and life. Now, Richard Boyatzis and Annie McKee provide an indispensable guide to overcoming the vicious cycle of stress, sacrifice, and dissonance that afflicts many leaders. Drawing from extensive multidisciplinary research and real-life stories, *Resonant Leadership* offers a field-tested framework for creating the resonance that fuels great leadership.

Rather than constantly sacrificing themselves to workplace demands, leaders can manage the cycle using specific techniques to combat stress, avoid burnout, and renew themselves physically, mentally, and emotionally. The book reveals that the path to resonance is through mindfulness, hope, and compassion and shows how intentionally employing these qualities creates effective and enduring leadership. Great leaders are resonant leaders. *Resonant Leadership* offers the inspiration--and tools--to spark and sustain resonance in ourselves and in those we lead.

Becoming Vaishnava in an Ideal Vedic City centers on a growing multinational community of ISKCON (International Society for Krishna Consciousness) devotees in Mayapur, West Bengal. While ISKCON's history is often presented in terms of an Indian guru 'transplanting' Indian spirituality to the West, this book focusses on the efforts to bring ISKCON back to India. Paying particular attention to devotees' failure to consistently live up to ISKCON's ideals, and the ongoing struggle to realize the utopian vision of an 'ideal Vedic city', this book argues that beyond a focus on virtue, the anthropology of ethics must account for how moral systems accommodate the problem of moral failure.

Resonance gathers together forty years of anthropological study by a researcher and writer with one of the broadest fieldwork résumés in anthropology: Unni Wikan. In its twelve essays—four of which are brand new—*Resonance* covers encounters with transvestites in Oman, childbirth in Bhutan, poverty in Cairo, and honor killings in Scandinavia, with visits to several other locales and subjects in between. Including a comprehensive preface and introduction that brings the whole work into focus, *Resonance* surveys an astonishing career of anthropological inquiry that demonstrates the possibility for a common humanity, a way of knowing others on their own terms. Deploying Clifford Geertz's concept of "experience-near" observations—and driven by an ambition to work beyond Geertz's own limitations—Wikan strives

for an anthropology that sees, describes, and understands the human condition in the models and concepts of the people being observed. She highlights the fundamentals of an explicitly comparative, person-centered, and empathic approach to fieldwork, pushing anthropology to shift from the specialist discourses of academic experts to a grasp of what the Balinese call *keneh*— the heart, thought, and feeling of the real people of the world. By deploying this strategy across such a range of sites and communities, she provides a powerful argument that ever-deeper insight can be attained despite our differences.

Understanding and Healing Emotional Trauma is an interdisciplinary book which explores our current understanding of the forces involved in both the creation and healing of emotional trauma. Through engaging conversations with pioneering clinicians and researchers, Daniela F. Sieff offers accessible yet substantial answers to questions such as: What is emotional trauma? What are the causes? What are its consequences? What does it mean to heal emotional trauma? and How can healing be achieved? These questions are addressed through three interrelated perspectives: psychotherapy, neurobiology and evolution. Psychotherapeutic perspectives take us inside the world of the unconscious mind and body to illuminate how emotional trauma distorts our relationships with ourselves and with other people (Donald Kalsched, Bruce Lloyd, Tina Stromsted, Marion Woodman). Neurobiological perspectives explore how trauma impacts the systems that mediate our emotional lives and well-being (Ellert Nijenhuis, Allan Schore, Daniel Siegel). And evolutionary perspectives contextualise emotional trauma in terms of the legacy we have inherited from our distant ancestors (James Chisholm, Sarah Blaffer Hrdy, Randolph Nesse). Transforming lives affected by emotional trauma is possible, but it can be a difficult process. The insights shared in these lively and informative conversations can support and facilitate that process. This book will therefore be a valuable resource for psychotherapists, psychologists, counsellors and other mental health professionals in practice and training, and also for members of the general public who are endeavouring to find ways through their own emotional trauma. In addition, because emotional trauma often has its roots in childhood, this book will also be of interest and value to parents, teachers and anyone concerned with the care of children.

Fragile Resonance describes the paths carers take as they make meaning of their experiences and find a sense of moral purpose to sustain them and guide their decisions. When a parent or partner becomes frail or disabled, often a family member assumes responsibility for their care. But family care is a physically and emotionally exhausting undertaking. Carers experience moments of profound connection as well as pain and grief. Carers ask themselves questions about the meaning of family, their entitlement to support, and their capacity to understand and sympathize with another person's pain. Based on his research gathering stories of family carers in Japan and England, Jason Danely traces how care transforms individual sensibilities and the roles of cultural narratives and imagination in shaping these transformations, which persist even after the care recipient has died. Throughout *Fragile Resonance*, Danely examines the implications of unpaid carer's experiences for challenging and enhancing social policies and institutions, highlighting innovative alternatives grounded in the practical ethics of care.
