Decolonizing Indigenous Histories makes a vital contribution to the decolonization of archaeology by recasting colonialism within long-term indigenous histories.

Showcasing case studies from Africa, Australia, Mesoamerica, and North and South America, this edited volume highlights the work of archaeologists who study indigenous peoples and histories at multiple scales. The contributors explore how the inclusion of indigenous histories, and collaboration with contemporary communities and scholars across the subfields of anthropology, can reframe archaeologies of colonialism. The cross-cultural case studies

employ a broad range of methodological strategies—archaeology, ethnohistory, archival research, oral histories, and descendant perspectives—to better appreciate processes of colonialism. The authors argue that these more complicated histories of colonialism contribute not only to understandings of past contexts but also to contemporary social justice projects. In each chapter, authors move beyond an academic artifice of “prehistoric” and “colonial” and instead

focus on longer sequences of indigenous histories to better understand colonial contexts. Throughout, each author explores and clarifies the complexities of indigenous daily practices that shape, and are shaped by, long-term indigenous and local histories by employing an array of theoretical tools, including theories of practice, agency, materiality, and temporality. Included are larger integrative chapters by Kent Lightfoot and Patricia Rubertone,

foremost North American colonialism scholars who argue that an expanded global perspective is essential to understanding processes of indigenous-colonial interactions and transitions.

Contemporary sport could not function without the involvement of voluntary organizations, from local grass-roots clubs to international agencies such as the International Olympic Committee.

Management of this sector continues to undergo profound change, largely in response to the challenges of professionalization and increasing expectations in terms of transparency, accountability and ethical behaviour. This book fills a significant gap in the literature on sport management by setting out the principles and practices necessary for effective management of voluntary sport organizations around the world. In addition to applying and adapting

established management strategies and techniques to voluntary sport organizations, this book is the first to fully relate mainstream organizational theory to this important sector of sport management. With contributions from an international team of researchers and management practitioners, the book explores key functional areas such as: governance strategy and planning human resources finance managing change marketing event

management risk management. Each chapter discusses best practice and includes case study material, self test questions and guides to further reading. As the only book to outline a professional, theoretically informed and practically focused curriculum for voluntary sport management, this book is essential reading for all students of sport management and all managers working in or alongside the voluntary sector.

The Domestic Assault of Women relates social and criminal justice policy to empirically tested social

psychological theory about the causes and effects of wife assault. Donald G. Dutton argues that only by understanding the psychology of both the aggressors and the victims of wife assault can we generate informed social and criminal justice policy. By linking the psychological factors that support assaultive habits to police arrest policy and subsequent treatment, Dutton shows how police/therapist intervention can interrupt assaultive behaviour and

prevent recidivism. **Essentials of Health Care Finance** Yale University Press Andean peoples joined the world of alphabetic literacy nearly 500 years ago, yet the history of their literacy has remained hidden until now. In *The Lettered Mountain*, Frank Salomon and Mercedes Niño-Murcia expand notions of literacy and challenge stereotypes of Andean “orality” by analyzing the writings of mountain villagers from Inka times to the Internet era. Their historical

ethnography is based on extensive research in the village of Tupicocha, in the central Peruvian province of Huarochirí. The region has a special place in the history of Latin American letters as the home of the unique early-seventeenth-century Quechua-language book explaining Peru’s ancient gods and priesthoods. Granted access to Tupicocha’s surprisingly rich internal archives, Salomon and Niño-Murcia found that legacy reflected in a distinctive version of lettered life

developed prior to the arrival of state schools. In their detailed ethnography, writing emerges as a vital practice underlying specifically Andean sacred culture and self-governance. At the same time, the authors find that Andean relations with the nation-state have been disadvantaged by state writing standards developed in dialogue with European academies but not with the rural literate tradition.

In the fifth of the River Cottage Handbook series, John Wright reveals the rich pickings to be had on the seashore - and the team at River Cottage explain how to cook them to perfection. For the forager, the seashore holds surprising culinary potential. In this authoritative, witty book John Wright takes us on a trip to the seaside. But before introducing us to the various species to be harvested, he touches on such practicalities as conservation and the ethics of foraging; safety

from tides, rocks and food poisoning; the law and access to the shore, our right to fish, landing sizes and seasons; and equipment such as nets, pots and hooks. Next comes the nitty-gritty: all the main British seashore species that one might be tempted to eat. The conservation status, taste and texture, availability, seasonality, habitat, collecting technique and biology of each species is covered; there are also quite a few gratuitous but fascinating diversions. The species covered

include crustacea (brown shrimp, common crab, lobster, prawn, shore crab, spider crab, squat lobster, velvet swimming crab); molluscs (clams, cockle, dog whelk, limpet, mussel, oyster, razor clam, winkle); mushrooms; plants (alexanders, babbington's orache, fennel, frosted orache, marsh samphire, perennial wall rocket, rock samphire, sea beet, sea buckthorn, sea holly, sea kale, sea purslane, sea rocket, spear-leaved orache, wild cabbage, wild thyme); and seaweed

(carragheen, dulse, gut weed, laver, pepper dulse, sea lettuce, sugar kelp, kelp). Finally, there are thirty brilliant recipes. Introduced by Hugh Fearnley-Whittingstall, *Edible Seashore* is destined to join the other handbooks in the series as an indispensable household reference.

Lethal Legacy (Guardians of Justice Book #3) Knopf Books for Young Readers
Writing has long been linked to power. For early modern people on both sides of the Atlantic,

writing was also the province of notaries, men trained to cast other people's words in official forms and make them legally true. Thus the first thing Columbus did on American shores in October 1492 was have a notary record his claim of territorial possession. It was the written, notarial word—backed by all the power of Castilian enforcement—that first constituted Spanish American empire. Even so, the Spaniards who invaded America in 1492 were not fond of their

notaries, who had a dismal reputation for falsehood and greed. Yet Spaniards could not do without these men. Contemporary scholars also rely on the vast paper trail left by notaries to make sense of the Latin American past. How then to approach the question of notarial truth? Kathryn Burns argues that the archive itself must be historicized. Using the case of colonial Cuzco, she examines the practices that shaped document-making. Notaries were

businessmen, selling clients a product that conformed to local “custom” as well as Spanish templates. Clients, for their part, were knowledgeable consumers, with strategies of their own for getting what they wanted. In this inside story of the early modern archive, Burns offers a wealth of possibilities for seeing sources in fresh perspective. *Invaders as Ancestors* Seal Press
“Whether you’re an individual woman looking

for help or a reader looking for the truth about the thousands of women who are battered by the men they live with, *Next Time, She’ll Be Dead* is the one book you should read.” —Gloria Steinem At least 1 in 4 women will be abused during her lifetime—that is 25% of our mothers, daughters, sisters, partners, and friends. Thousands will be killed. As author Ann Jones observes, despite its devastation battering is regarded not as a serious crime, but instead as an inevitable “problem”

blandly labeled “domestic violence.” Stories of household assaults and murders are all over the news, but the blame is usually pinned on the woman who is said to have either provoked the attack or failed to “leave.” In this groundbreaking book, Jones points instead to the many factors in society that promote, trivialize, and perpetuate brutality against women: from popular psychology, academic “expertise,” mass media, and pop culture, to the criminal justice system and the

law itself. Delving deep into the history, legality, and personal politics of male violence against wives and girlfriends, *Next Time, She’ll Be Dead* fearlessly reframes the issue. This critically acclaimed masterwork offers productive ways of thinking and speaking about battering and explains what must be done to stop it.

Beyond the Lettered City Duke University Press
Skillfully interweaving Bernice's own eloquent words about her

harrowing abuse with descriptions of other women's similar experiences and a rich synthesis of statistical findings, Jody Raphael demonstrates convincingly that domestic violence and dependence on public assistance are intricately linked. In a work that is sure to stir controversy, she challenges traditional views and stereotypes (conservative and liberal) about welfare recipients, arguing that many poor women are neither lazy nor paralyzed by a

"culture of poverty," but instead are trapped by their batterers. Bernice's ordeals at the hands of her abusive partner -- brutal beatings, violent rapes, threats on her life, stalking, blocked access to birth control, and sabotage of efforts to find a job -- resonate throughout the work. The experiences she relates provide crucial insights into the welfare system and illuminate its failures, successes, and potential in helping women like her.

This disquieting yet inspiring book puts a human face on the heated public policy debate over welfare reform. Above all, it is Bernice's life story and, through her voice, the story of countless other battered women who are isolated in poverty and welfare by the power and control of their abusers.
