 Promote active learning and constructive interchange among students with these architecturally-based assignments that present

a practical, hands-on approach to understanding basic 2-D AutoCAD® commands and operations. This series of 17 self-instructional, skill-building assignments challenges students to master specific and selected AutoCAD commands, operations, and formats necessary to draw and plot typical 2-D residential and commercial architectural drawings. Students progress step-by-step through the assignments, applying previous lessons while

they expand their skills with each new exercise. Assignments are designed to span one semester of work and are grouped into two sections: the Georgian House introduces the range of basic 2-D commands needed to "build" a simple furnished floor plan and exterior elevation, and the Furness Brownstone presents more complex plan views and exterior elevations.
