the Mountain (Book of the Ice, Book 2)
 University of Chicago Press
 A book that guides the reader through the Dyatlov Pass mystery. It's a cohesive collection of facts, photos, autopsy profiles, and theories presented in a clear and straightforward manner. This mystery is 60 years old, yet it still resonates today. Nine experienced winter hikers were found dead with horrific injuries such

as missing eyes and crushed ribs. This is the only book that utilizes and presents all the clues to support a viable theory and does it in a manner that is well-written and memorable.

interested in traveling the world or journeying into the soul. Kholat Syakhl Celtic Cat Publishing LLC A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the

men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for

any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award. *Hugh Glass, Mountain Man* Severed Press

this book is based on an actual true event. In 1959 nine hiker's went missing in the Northern Ural mountain range on February 2nd. Weeks after their supposed return trip. A search and rescue team was set up when the hiker's did not return for their trip. Their bodies were discovered and all nine of them dead. The bodies had mysterious injuries and other strange oddities. The

deaths were listed as unexplained. Present year 2014, a paranormal investigation team was called in to try to find the cause of the nine hiker's demise. But they were unaware of the dangers they had put themselves in. Will they survive Kholat Syakhl: Mountain Of The Dead? *Death of Nine* Direct Authors A unique modern memoir of growing up in rural China, Colours of the Mountain is a

powerful and moving story of supreme determination and extraordinary faith against the most impossible odds. Da Chen was born in 1962 in a town over 50 hours' train journey from Beijing. Persecuted because of his family's landlord status, Da was an easy target for the farmer-teachers and bullying peasant boys. Whilst his older brother and sisters were forced to work in the fields, Da tired

of the chaotic schooling of the Cultural Revolution and found solace with a band of good-time thugs. Following the death of Mao, an academic meritocracy was reintroduced. Da determined to escape Ch'ing Mountain, where he ran around barefoot and there was no electricity and no future. Together with his brother Jin, who had been working the land since boyhood, he began to study day and

night. His determination is staggering and inspiring. In 1978, at the age of sixteen, Da Chen took a bus and a train for the first time in his life and travelled to Beijing, to the best English language institute in China. A book about friendships, prejudice, familial love and academic striving, and of one man's escape from hunger, poverty and ignorance, *Colours of the Mountain* is an inspiring and eloquently

recounted memoir.

Dead Mountain

Vintage

This controversial, eye-opening book by Elizabeth McGreevy suggests a different perception of Mountain Cedars (also called Ashe Junipers). It digs into the politics, history, economics, culture, and ecology surrounding these trees in the Hill Country of Texas from the 1700s to the present. Since the

1920s, reporters, writers, scientists, landowners, politicians, and cedar fever victims have characterized the trees as a non-native, water-hogging, grass-killing, toxic, useless species to justify its removal. The result has been a glut of Mountain Cedar tall tales. Yet before the 1890s, people highly respected Mountain Cedars. The Mountain Cedars they

reported were large timber trees with strong, decay-resistant heartwood. Most were cut down and sold to boost the young Hill Country economy. The clearcutting of old-growth forests and dense woodlands and the continuous overgrazing of prairies that followed led to mass soil degradation and erosion. Acting as nature's bandage, Mountain Cedars morphed into pioneering

bushes and spread across degraded soils. This book tracks down the origins of the tall tales to determine what is true, what is false, and what is somewhere in between. Through a series of revelations, the author replaces anti-cedar sentiments with a more constructive, less emotional approach to Hill Country land management. With an introduction by Will Self. **Colours Of The Mountain** Faber & Faber #1 NATIONAL BESTSELLER • "A harrowing tale of the perils of high-altitude climbing, a story of bad luck and worse

judgment and of heartbreaking heroism." —PEOPLE A bank of clouds was assembling on the not-so-distant horizon, but journalist-mountaineer Jon Krakauer, standing on the summit of Mt. Everest, saw nothing that "suggested that a murderous storm was bearing down." He was wrong. The storm, which claimed five lives and left countless more-- including

Krakauer's--in guilt-ridden disarray, would also provide the impetus for *Into Thin Air*, Krakauer's epic account of the May 1996 disaster. By writing *Into Thin Air*, Krakauer may have hoped to exorcise some of his own demons and lay to rest some of the painful questions that still surround the event. He takes great pains to provide a balanced picture of the people and events he witnessed and

gives due credit to the tireless and dedicated Sherpas. He also avoids blasting easy targets such as Sandy Pittman, the wealthy socialite who brought an espresso maker along on the expedition. Krakauer's highly personal inquiry into the catastrophe provides a great deal of insight into what went wrong. But for Krakauer himself, further interviews and

investigations only lead him to the conclusion that his perceived failures were directly responsible for a fellow climber's death. Clearly, Krakauer remains haunted by the disaster, and although he relates a number of incidents in which he acted selflessly and even heroically, he seems unable to view those instances objectively. In the end, despite his evenhanded

and even generous assessment of others' actions, he reserves a full measure of vitriol for himself. This updated trade paperback edition of *Into Thin Air* includes an extensive new postscript that sheds fascinating light on the acrimonious debate that flared between Krakauer and Everest guide Anatoli Boukreev in the wake of the tragedy. "I have no doubt that Boukreev's

intentions were good on summit day," writes Krakauer in the postscript, dated August 1999. "What disturbs me, though, was Boukreev's refusal to acknowledge the possibility that he made even a single poor decision. Never did he indicate that perhaps it wasn't the best choice to climb without gas or go down ahead of his clients." As usual, Krakauer supports his points with dogged research and

a good dose of humility. But rather than continue the heated discourse that has raged since *Into Thin Air*'s denouncement of guide Boukreev, Krakauer's tone is conciliatory; he points most of his criticism at G. Weston De Walt, who coauthored *The Climb*, Boukreev's version of events. And in a touching conclusion, Krakauer recounts his last conversation with the late

Boukreev, in which the two weathered climbers agreed to disagree about certain points. Krakauer had great hopes to patch things up with Boukreev, but the Russian later died in an avalanche on another Himalayan peak, Annapurna I. In 1999, Krakauer received an Academy Award in Literature from the American Academy of Arts and Letters--a prestigious

prize intended "to honor writers of exceptional accomplishment." According to the Academy's citation, "Krakauer combines the tenacity and courage of the finest tradition of investigative journalism with the stylish subtlety and profound insight of the born writer. His account of an ascent of Mount Everest has led to a general reevaluation of climbing and of the commercializa-

tion of what was once a romantic, solitary sport; while his account of the life and death of Christopher McCandless, who died of starvation after challenging the Alaskan wilderness, delves even more deeply and disturbingly into the fascination of nature and the devastating effects of its lure on a young and curious mind." *Touching the Void* Simon and Schuster #1 NEW YORK

Mountain Cedars** Modern Library

This is the first stunning installment of Fiona Mountain's riveting new mystery series that uncovers the secrets of the dead. Pale as the Dead deals with the mysterious death of Lizzie Siddal, a real and fascinating historical figure whose beauty and tragic life have made her into a legend. (She was the model for the famous painting on the cover of the book.) Lizzie's death has always been

shrouded in mystery. She is perhaps best known for the macabre story that tells of her husband, the Pre-Raphaelite artist Dante Gabriel Rossetti, having her coffin dug up to retrieve some poems he had buried with her. When the coffin was opened, Lizzie was said to be as beautiful as the day she died. Pale as the Dead is the story of how the disappearance of a young girl, Bethany,

appears to be linked in some way to Lizzie Siddal. Our detective is Natasha Blake, a complex young genealogist with a passion for history. Natasha's career choice is partly driven by the mystery of her own roots--she was abandoned in the hospital as a newborn. Her mother disappeared hours after giving birth, leaving a false name and address and a note on the back of a picture

postcard that said simply, "Her name is Natasha." Natasha is hired by the missing girl's lover, Adam, whose own life seems to have plenty of dark shadows. An old diary and famous graveyard lead Natasha into more danger than she bargains for--some people will do ANYTHING to keep a secret! **The Things They Carried** UNM Press "Harun is heir apparent to Louise Erdrich and Harry Crews.... Readers will

be swept away by this breathless, absorbing novel.” —Claire Vaye Watkins, The New York Times Book Review In this mysterious and chilling novel, girls, mostly Native, are vanishing from the sides of a notorious highway in the isolated Pacific Northwest. Leo Kreutzer and his friends are barely touched by these disappearance s—until a series of enigmatic strangers arrive in their

remote mountain town, beguiling and bewitching them. It seems as if the devil himself has appeared among them. The intoxicatingly lush debut novel by the acclaimed author of The King of Limbo, A Man Came Out of a Door in the Mountain is an unsettling portrait of life in a dead-end town, as seductive and beautifully written as the devil’s dark arts are wielded.

Appalachian Book of the Dead

Locked away in refrigerated

vaults, sanitized by gas chambers, and secured within bombproof caverns deep under mountains are America's most prized materials: the ever-expanding collection of records that now accompany each of us from birth to death. This data complex backs up and protects our most vital information against decay and destruction, and yet it binds us to corporate and

government institutions whose power is also preserved in its bunkers, infrastructures, and sterilized spaces. We the Dead traces the emergence of the data complex in the early twentieth century and guides readers through its expansion in a series of moments when Americans thought they were living just before the end of the world. Depression-era

eugenicists feared racial contamination and the downfall of the white American family, while contemporary technologists seek ever denser and more durable materials for storing data, from microetched metal discs to cryptocurrency keys encoded in synthetic DNA. Artfully written and packed with provocative ideas, this haunting book illuminates the dark places of the data complex

and the ways
it increasingly
blurs the lines
