The abortifacient RU-486 was born in the laboratory, but its history has been shaped by legislators, corporate marketing executives, and protesters on both sides of the abortion debate. This volume explores how society decides what to do when discoveries such as RU-486 raise complex and emotional policy issues. Six case studies with insightful commentary offer a revealing look at the interplay of scientists, interest groups, the U.S. Congress, federal agencies, and the public in determining biomedical public policy—and suggest how decision making might become more reasoned and productive in the future. The studies are fascinating and highly readable accounts of the personal interactions behind the headlines. They cover dideoxyinosine (ddI), RU-486, Medicare coverage for victims of chronic kidney failure, the human genome project, fetal tissue transplantation, and the 1975 Asilomar conference on recombinant DNA.

Gregory Bateson was a philosopher, anthropologist, photographer, naturalist, and poet, as well as the husband and collaborator of Margaret Mead. This classic anthology of his major work includes a new Foreword by his daughter, Mary Katherine Bateson. 5 line drawings.

**Théorie du Code penal** Penguin Group  
The Ghost Line is a haunting science fiction story about the Titanic of the stars by debut authors Andrew Neil Gray and J. S. Herbison that Lawrence M. Schoen calls "a delicious rush of the future and the past." The Martian Queen was the Titanic of the stars before it was decommissioned, set to drift back and forth between Earth and Mars on the off-chance that reclaiming it ever became profitable for the owners. For Saga and her husband Michel the cruise ship represents a massive payday. Hacking and stealing the ship could earn them enough to settle down, have children, and pay for the treatments to

save Saga's mother's life. But the Martian Queen is much more than their employer has told them. In the twenty years since it was abandoned, something strange and dangerous has come to reside in the decadent vessel. Saga feels herself being drawn into a spider's web, and must navigate the traps and lures of an awakening intelligence if she wants to go home again. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Steps to an Ecology of Mind Ústav mezinárodních vztahů, v. v. i.

Includes over 75 maps, photos and plans. The present volume describes the activities of the U.S. Army in Vietnam during World War II, military advice and assistance to the French government during the immediate post-war years, and the advisory program that developed after the Geneva Agreements of 1954. Its scope ranges from high-level policy decisions to low-echelon advisory operations in the field, presented against a background of relevant military and political developments. The author enjoyed access to the official records of the period and examined personal papers, interviews, other documentary sources, and miscellaneous published materials. Useful not only as a study of military assistance but as a view of the Army as an agent of national policy, this volume is a fitting introduction to the overall study of the conflict in Vietnam.

Giltner's thorough research using slave narratives, sportsmen's recollections, records of fish and game clubs, and sporting periodicals offers a unique perspective on the African-American struggle for independence from the end of the Civil War to the 1920s.

On Revolution New York : United Nations, Department of Economic and Social Affairs  
World War II remains the defining experience for the U.S. Army in the twentieth century. It has had a lasting

impact on the nation and its place in the world and on the Army and the way it organizes and fights. Although historians have written numerous volumes concerning this global conflict, some gap in the literature remain. In particular, the subject of an American field army headquarters and its organization and role have attracted little attention. Studies on the personalities and styles of individual commanders exist, but the command posts themselves—the ways in they were structures and operated and the functions they performed—have not been much explored. With *A Command Post at War: First Army Headquarters in Europe, 1943-1945*, the Center of Military History attempts to redress this shortcoming. This study addresses the First Army headquarters in the European theater from its activation in October 1943 to V-E Day in May 1945. Under Generals Omar N. Bradley and Courtney H. Hodges, the First Army headquarters oversaw the American landings on D-Day, the breakout from the Normandy beachhead, the battle of Hürtgen Forest along the German frontier, the defense of the northern shoulder during the Battle of the Bulge, and the

crossing of the Rhine River at Remagen prior to the final American drive into central Germany. In examining the First Army headquarters' role, this volume shows the army headquarters of World War II as a complicated organization with functions ranging from the immediate supervision of tactical operations to long-range operational planning and the sustained support of frontline units. The commander and staff faced the problem of coordination with Allied counterparts as well as with headquarters and units from other services. Inadequate information and the limitations of technology added to their challenges. The human dimension was always important, and at times critical, in affecting the work of the headquarters under the stresses of a difficult campaign against an obstinate and resourceful foe. Although times have changed and the modern Army focuses more on regional conflicts and contingencies than on global warfare, we can still learn much from the experience of the First Army headquarters. The Gulf War reemphasized the role of an army headquarters in a theater of operations as a pertinent issue for today's military

professional. By examining the experience of soldiers in past conflicts we gain the deeper perspectives and understandings necessary to meet the challenges facing the Army today and in the future.
