Nursing Care Plans F. A. Davis Company
A one-of-a-kind guide specifically for rehabilitation specialists! A leader in pharmacology and rehabilitation, Charles Ciccone, PT, PhD offers a concise, easy-to-access resource that delivers the drug information rehabilitation specialists need to know. Organized alphabetically by generic name, over 800 drug monographs offer the most up-to-date information on drug indications, therapeutic effects, potential adverse reactions, and much more! A list of implications for physical therapy at the end of each monograph helps you provide the best possible care for your patients. It's the perfect companion to

Pharmacology in Rehabilitation, 4th Edition!
NANDA International Nursing Diagnoses Oxford University Press
The quintessential guide to nursing diagnoses from NANDA-I experts in new updated edition Fully updated and revised by editors T. Heather Herdman, Shigemi Kamitsuru, and Camila Takáó Lopes, *NANDA International Nursing Diagnoses: Definitions and Classification, 2021-2023, 12th Edition* is the definitive guide to nursing diagnoses, as reviewed and approved by the NANDA International (NANDA-I) Diagnosis Development Committee (DDC). In this new edition of a seminal text, the editors have revised all introductory chapters, providing critical information needed for nurses to understand assessment, its link to diagnosis and clinical reasoning, and the

purpose and use of taxonomic structure for nurses at the bedside. Researchers will also find new recommendations to improve the terminology. Additional Key Updates 46 new nursing diagnoses and 67 revised diagnoses Changes to 17 nursing diagnosis labels, ensuring they are consistent with current literature and reflect a human response Refinement of the vast majority of the nursing diagnosis related/risk factors Standardization of diagnostic indicator terms (defining characteristics, related factors, risk factors) to further aid clarity for students and clinicians Coding of all terms for those using electronic versions of the terminology Web-based resources include reference lists for new and revised diagnoses New chapter on revised Level of Evidence Criteria for diagnosis submission Rigorously updated and revised, the new edition

of this acclaimed text is a must-have resource for all nursing students, professional nurses, nurse educators, nurse informaticists, nurse researchers, and nurse administrators.

Introduction to Critical Care Nursing

F.A. Davis
The bestselling LPN/LVN geriatric nursing textbook, *Basic Geriatric Nursing, 5th Edition* covers age-appropriate nursing interventions in a variety of health care settings. It includes the theories and concepts of aging, covers expected physiologic and psychosocial changes, and highlights delegation, coordinated care, end-of-life care, patient teaching, quality of life, safety, and home care. This edition is updated with the latest issues and trends in geriatric nursing, including changes to the health care system and demographics. Part of the popular LPN Threads series, Gloria Hoffman Wold's text provides a clear and compassionate introduction to geriatric care. Complete coverage of key topics includes baby boomers and the impact of their aging on the health care system, therapeutic communication, cultural considerations, spiritual influences, evidence-

based practice in geriatric nursing, and elder abuse, restraints, and ethical and legal issues in end-of-life care. **UNIQUE!** Delegation, leadership, and management content is integrated throughout.

Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders.

UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with scenario-based clinical activities and practice questions. **UNIQUE!**

Nursing interventions are numbered and grouped according to health care setting (e.g., acute care, extended care, home care), in a patient-centered approach emphasizing the unique needs of the older adult. **UNIQUE!** Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. **UNIQUE!**

Critical Thinking boxes help you to assimilate and synthesize information. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care

and patient sensitivity. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. **UNIQUE!** Complementary and Alternative Therapies boxes address specific therapies commonly used by the geriatric population for health promotion and pain relief. Cultural Considerations boxes encourage culturally sensitive care of older adults. **UNIQUE!** Patient Teaching boxes highlight health promotion, disease prevention, and age-specific interventions. **UNIQUE!** LPN Threads make learning easier, featuring an appropriate reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design.

Medical-Surgical Nursing Care Planning Resource, First South Asia Edition

the thousands who have passed their exams with her guidance.

Study Guide for Introduction to Medical-Surgical Nursing F.A.

Davis

With just the right level of information to equip you to effectively care for adults and older adults, Linton's *Introduction to Medical-Surgical Nursing*, 5th Edition is the leading LPN/LVN text in its field. Covering both med-surg and psychiatric mental health conditions and disorders, it addresses your role in a variety of care settings, emphasizes culturally competent care and holistic nursing, and thoroughly covers all relevant NCLEX-PN Test Plan content. Abundant real-life case studies clearly show how to apply what you've learned to clinical practice. Features separate chapters on common, high-profile disorders (including hypertension, diabetes, and shock), providing an in-depth understanding for patient care. Offers foundational units on basic concepts related to the health care system, care settings, the nursing process, leadership, nutrition, the older adult, growth and nutrition, legal/ethical considerations, evidence-

based nursing care, and many more essential topics, avoiding repetition later in the text. Includes a separate, comprehensive unit on the older adult and related disorders — no other LPN/LVN med-surg text has as much coverage of this primary patient group. Includes a separate, comprehensive unit on psychosocial responses to illness, psychiatric disorders, and substance abuse — eliminating the need for a separate psychiatric mental health nursing text. Emphasizes content related to the NCLEX-PN Test Plan, including health promotion, nutrition, legal/ethical issues, HIPAA, and prevention of medication/medical errors. Offers in-depth pharmacology coverage: the Pharmacology Tutorial covers drug classifications, how drugs work, and nursing responsibilities; Pharmacology Capsules boxes provide medication information, precautions for use, interactions, and side/adverse effects; and Pharmacology and Medications tables in body systems chapters include classification, use/action, side/adverse effects, and nursing interventions — all with the goal of reducing

medication errors on the job and equipping you to pass the NCLEX exam. Assists with assignment and supervision, helping you assign tasks to nurse assistants, patient care techs, and unlicensed assistive personnel, and making sure you understand the difference between delegation, management, supervision, and assignment of tasks on the health care team. Features Diagnostic Tests and Procedures tables for a quick reference to MRI, CT, Doppler flow, lumbar puncture tests for neurologic disorders, and much more. Highlights timely information with Health Promotion boxes, Cultural Considerations boxes, Nutrition Considerations boxes, and Complementary and Alternative Therapies boxes. Provides bulleted lists of nursing instructions for Patient Teaching Plans, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Provides consistent Nursing Care Plans that reinforce the nursing process and focus on critical thinking, and Put on Your Thinking Cap Critical Thinking boxes encourage you to pause and consider the practical

implications of what you have just read.

Critical Care Plans Thieme
Covering the full range of nursing interventions, **Nursing Interventions Classification (NIC), 6th Edition** provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided - including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. **NIC Interventions Linked to 2012-2014 NANDA-I Diagnoses** promotes clinical decision-making. **New!** Two-color design provides easy readability. 554 research-based

nursing intervention labels with nearly 13,000 specific activities. **NEW!** 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. **NEW!** 133 revised interventions are provided for 49 specialties, including five new specialty core interventions. **NEW!** Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

All-in-One Care Planning Resource F.A. Davis
Maternal Newborn Nursing Care Plans, Third Edition teaches students and practicing nurses how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Featuring more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, it includes NIC interventions, discussions on collaborative problems, key nursing activities,

signs and symptoms, and diagnostic studies. Using a progressive approach, the text begins with generic care plans that address all patient situations regardless of the patient diagnosis or condition before moving on to more complicated and specific care plans.

Nursing Care Planning Made Incredibly Easy!

Elsevier Health Sciences Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.
Fragility Fracture Nursing Elsevier Health Sciences
The Fifth Edition of **Nursing Care Plans and Documentation** provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step

guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smarthinking--Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

Nursing Concept Care Maps for Safe Patient Care

Elsevier Health Sciences
Covers essential critical care concepts, technology, and procedures. This title addresses the advances in high-acuity care and emphasizes patient safety and optimum patient outcomes.

General Nursing - Medical and Surgical Textbook

Elsevier Health Sciences
Student-friendly and easy to use, the Study Guide for Introduction to Medical-Surgical Nursing, 5th Edition, is designed to

help you master content and evaluate your progress through practical, useful exercises and activities, including a wealth of multiple-choice and alternate-format questions. This edition places an increased emphasis on higher-level application questions, including exercises to encourage practice in setting priorities, to prepare you to transfer your knowledge of medical-surgical concepts to patient care in the clinical setting. Helps you hone critical thinking skills essential for success on licensure exams and in clinical practice.

Reinforces textbook content and provides ample opportunity for self-assessment with a wide variety of learning activities, including matching (key term and vocabulary review), completion, listing, labeling (illustrations), ranking/ordering, and application questions for textbook nursing care plans. Includes textbook page references, making self-assessment easier and faster. Emphasizes application of nursing concepts with new knowledge and comprehension exercises and activities that ask you to apply your knowledge

to patient care situations. Features a new section at the end of each chapter: Challenge Yourself! Getting Ready for the NCLEX includes both standard multiple-choice and alternate-format questions (over 1,800) that test your knowledge of chapter content while providing practice for the Boards. Provides valuable practice in prioritizing (deciding what to do first) and assignment (giving specific tasks to health care providers who may be supervised by LPNs) -- skills that are essential for providing effective nursing care and are covered on the NCLEX-PN Examination. Links you to online Evolve resources, where you'll find an additional set of review questions, encouraging utilization of and familiarity with an electronic format.

Maternal Newborn Nursing Care Plans

Elsevier Health Sciences
The Comatose Patient, Second Edition, is a critical historical overview of the concepts of consciousness and unconsciousness, covering all aspects of coma within 100 detailed case vignettes. This comprehensive text includes principles of neurologic examination of

comatose patients as well as instruction of the FOUR Score coma scale, and also discusses landmark legal cases and ethical problems. As the Chair of Division of Critical Care Neurology at Mayo Clinic, Dr. Wijdicks uses his extensive knowledge to discuss a new practical multistep approach to the diagnosis of the comatose patient. Additionally, this edition includes extensive coverage of the interpretation of neuroimaging and its role in daily practice and decision making, as well as management in the emergency room and ICU. Dr. Wijdicks details long-term supportive care and an appropriate approach to communication with family members about end-of-life decision making. In addition, video clips on neurologic examination and neurologic manifestations seen in comatose patients can be found here: <http://oxfordmedicine.com/comatosepatient2e>. All video recordings from the first edition have been reformatted and remastered for optimal use, and several more video clips of patients have also been included. *WHO Global Report on Falls Prevention in Older Age* John Wiley & Sons

Take your understanding to a whole new level with Pageburst digital books on VitalSource! Easy-to-use, interactive features let you make highlights, share notes, run instant topic searches, and so much more. Best of all, with Pageburst, you get flexible online, offline, and mobile access to all your digital books. The clear, concise, and cutting-edge medical-surgical nursing content in *Medical-Surgical Nursing: Concepts & Practice, 2nd Edition* provides the solid foundation you need to pass the NCLEX Examination and succeed as a new nurse. It builds on the fundamentals of nursing and covers roles, settings, health care trends, all body systems and their disorders, emergency and disaster management, and mental health nursing. Written by noted authors Susan deWit and Candice Kumagai, *Medical-Surgical Nursing* reflects current national LPN/LVN standards with its emphasis on safety as well as complementary and alternative therapies. UNIQUE! LPN Threads share learning features with Elsevier's other LPN textbooks, providing a consistency across the Elsevier LPN curriculum.

Key Terms include phonetic pronunciations and text page references. Key Points are located at the end of chapters and summarize chapter highlights. Overview of Anatomy and Physiology at the beginning of each body system chapter provides basic information for understanding the body system and its disorders. Nursing Process provides a consistent framework for disorders chapters. Evidence-Based Practice is highlighted with special icons indicating current research. Assignment Considerations boxes address situations in which the charge nurse delegates to the LPN/LVN or the LPN/LVN assigns tasks to unlicensed assistive personnel. Focused Assessment boxes include information on history taking and psychosocial assessment, physical assessment, and guidance on how to collect data/information for specific disorders. Elder Care Points boxes address the unique medical-surgical care issues that affect older adults. Legal and Ethical Considerations boxes focus on specific disorder-related issues. Safety Alert boxes highlight specific dangers to

patients related to medications and clinical care. Clinical Cues provide guidance and advice related to the application of nursing care. Think Critically About boxes encourage you to synthesize information and apply concepts beyond the scope of the chapter. Concept Maps in the disorders chapters help you visualize difficult material and illustrate how a disorder's multiple symptoms, treatments, and side effects relate to each other. Health Promotion boxes address wellness and disease prevention, including diet, infection control, and more. Complementary and Alternative Therapies boxes offer information on how nontraditional treatments for medical-surgical conditions may be used to complement traditional treatment. Cultural Considerations promote understanding and sensitivity to various ethnic groups. Nutrition Considerations address the need for holistic care and reflect the increased focus on nutrition in the NCLEX Examination. Patient Teaching boxes provide step-by-step instructions and guidelines for post-hospital care. Home Care Considerations boxes

focus on post-discharge adaptations of medical-surgical nursing care to the home environment. Mental Health Nursing unit includes information on disorders of anxiety and mood, eating disorders, cognitive disorders, thought and personality disorders, and substance abuse. Disaster Management content includes material focusing on preparation and mitigation to avoid losses and reduce the risk of injury associated with both natural and bioterrorist disasters. Nursing Care Plans with Critical Thinking Questions show how a care plan is developed and how to evaluate care of a patient. Review questions for the NCLEX-PN Examination at the end of each chapter include alternate-item format questions and help prepare you for class tests and the NCLEX exam. Critical Thinking Activities at the end of chapters include clinical situations and relevant questions, allowing you to hone your critical thinking skills. UNIQUE! Best Practices are highlighted to show the latest evidence-based research related to interventions. Online resources listed at the end of each chapter

promote comprehensive patient care based on current national standards and evidence-based practices. UNIQUE! Icons in page margins point to related animations, video clips, additional content, and related resources on the Evolve site.

Nursing Care Plans

Elsevier Health Sciences Here's the essential information you need to know in critical care nursing — all in one concise text! Using a to-the-point, reader friendly approach, *Introduction to Critical Care Nursing, 5th Edition*, provides authoritative, real-world information on the important concepts of critical care nursing and the assessment and technical skills associated with the management of critically ill patients. The latest content on the technology makes it easy to learn and understand how to use the equipment you'll use in the field. Nursing care chapters are organized according to the nursing process framework, and you'll find detailed nursing care plans in every management chapter. Case studies and critical thinking questions challenge you to apply what you've learned, and user-friendly features

throughout the text (updated pharmacology tables, clinical and laboratory alerts, and evidence-based practice boxes) help you bridge the gap between concepts and clinical practice. Nursing Care Plans provide nursing diagnoses, expected patient outcomes, and interventions with rationales to prepare you for clinical practice. Case Studies challenge you to apply concepts from the book to real-life patient situations to test their critical thinking skills. Streamlined and updated Pharmacology Tables detail the actions, indications, dosages and routes, and side effects of commonly used critical care drugs. Clinical Alerts promote optimal patient safety and outcomes by highlighting potential problems and concerns in the clinical setting. Laboratory Alerts discuss both common and cutting-edge tests and procedures, emphasizing the importance of laboratory test results to critical nursing care. Critical Thinking Questions in every chapter encourage you to use and reinforce the concepts presented throughout the chapter. Now full-color throughout,

new, vibrant artwork and anatomical images are in true-to-life color. A new chapter on end-of-life care covers ethical and legal matters, palliative care, withholding of therapies, and communication issues — all essential concerns confronting today's critical care nurse. New features on evidence-based practice, genetics, transplantation, and geriatric considerations offer realistic, easy-to-understand information on some of the most important and rapidly changing topics in critical care today.

Manual of Critical Care Nursing F.A. Davis

Here's the most complete and easy-to-use resource on how to develop practical, individualized plans of care for psychiatric and mental health patients. It's really two books in one! The first half provides the diagnostic information needed to create a care plan; the second half covers the safe prescription and administration of psychotropic medications. And, the concepts can be applied to a variety of healthcare settings...from in-patient hospitalization through the outpatient clinic...to home health and private practice.

Completely revised and updated throughout, the 9th Edition reflects all of the new knowledge and new medications in the field, including the DSM-5, all of today's new psychotropic medications, and the 2012-2014 content in the NANDA Nursing Diagnoses: Taxonomy II. [Basic Geriatric Nursing - E-Book](#) F.A. Davis Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and

documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new

disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Geriatric Nursing Care Plans Elsevier Health Sciences
104 Comprehensive Person Centered Care Plans on easy to use templates in the book and on the CD. Covers every nursing diagnosis and nursing care plan problem that may be generated from the Minimum Data Set - MDS 3.0. Includes 20 Care Area Assessments. How to write baseline and

comprehensive care plans. Nursing care plan standards. Nursing diagnoses, problem statements, goals, and interventions. Current with all RAI Manual Updates, Surveyor Guidelines and Federal Regulatory Changes, and PDP. Abusive, Activities, Activity Intolerance, Airway Clearance, Allergies, Allergies, Anemia, Anger, Angina, Anxiety, Blepharitis, Blood Sugars, Breathing Patterns, Cardiac Output, Cataracts, Chewing Problem, Cognitive Deficit, Decision-Making, Disordered Thinking, Memory Problem, Colostomy, Communication, Hearing, Speech, Conflict with Family / Friends/ Staff, Constipation, Dental Care, Depression, Diarrhea, Discharge Pending, Fall Risk, Family Coping, Fluid Volume Deficit, Fluid Volume Excess, Gastrointestinal Discomfort, Grief over Lost Status / Roles, Hoards Objects, Hypertension, Hypotension, Hypothyroidism, Incontinence, Knowledge Deficit, Manipulative Behaviors, Non-compliance, Obesity, Pacemaker, Pain, Paranoia, Parkinson's,

The Comatose Patient

Lippincott Williams & Wilkins

The only book featuring nursing care plans for all core clinical areas, Swearingen's All-In-One Nursing Care Planning Resource, 4th Edition provides 100 care plans with the nursing diagnoses and interventions you need to know to care for patients in all settings. It includes care plans for medical-

surgical, maternity/OB, pediatrics, and psychiatric-mental health, so you can use just one book throughout your entire nursing curriculum. This edition includes a new care plan addressing normal labor and birth, a new full-color design, new QSEN safety icons, new quick-reference color tabs, and updates reflecting the latest NANDA-I nursing diagnoses and collaborative problems. Edited by nursing expert Pamela L. Swearingen, this book is known for its clear approach, easy-to-use format, and straightforward rationales. NANDA-I nursing diagnoses are incorporated throughout the text to keep you current with NANDA-I terminology and the latest diagnoses. Color-coded sections for medical-surgical, maternity, pediatric, and psychiatric-mental health nursing care plans make it easier to find information quickly. A consistent format for each care plan allows faster lookup of topics, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with

Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized nursing diagnoses are listed in order of importance and physiologic patient needs. A two-column format for nursing assessments/interventions and rationales makes it easier to scan information. Detailed rationales for each nursing intervention help you to apply concepts to specific patient situations in clinical practice. Outcome criteria with specific timelines help you to set realistic goals for nursing outcomes and provide quality, cost-effective care. NEW! Care plan for normal labor and birth addresses nursing care for the client experiencing normal labor and delivery. UPDATED content is written by practicing clinicians and covers the latest clinical developments, new pharmacologic treatments, patient safety considerations, and evidence-based practice guidelines. NEW full-color design makes the text more user friendly, and includes NEW color-coded tabs and improved cross-referencing and navigation aids for faster lookup of information. NEW! Leaf icon highlights

coverage of complementary and alternative therapies including information on over-the-counter herbal and other therapies and how these can interact with conventional medications.

Maternal Newborn Nursing Care Plans

World Health Organization
A pocket-sized clinical companion, *Manual of Psychiatric Nursing Care Planning, 4th Edition* helps you assess psychiatric nursing clients, formulate nursing diagnoses, and design psychiatric nursing care plans. It offers quick and easy access to information on care in a range of settings including the inpatient unit, home care, or community mental health setting. Expert author Elizabeth M. Varcariolis, RN, MA, provides a clinically based focus with the latest guidelines to psychiatric nursing care. Designed to accompany *Foundations of Mental Health Nursing*, this book is a perfect reference for creating care plans and for clinical use. Current coverage includes the latest diagnoses, assessment and treatment strategies, and psychotropic drug information relevant to

nursing care of patients with psychiatric disorders. Clinically based information helps you provide patient care in a range of environments including the inpatient unit, community mental health setting, or home care setting. Coverage of all major disorders includes those commonly encountered in a clinical setting. A consistent format for each care plan includes a nursing diagnosis, etiology, assessment findings/diagnostic cues, outcome criteria, long-term goals, short-term goals, and interventions and rationales. Assessment tools such as tables, charts, and questionnaires are provided in an appendix for quick reference. A Major Psychotropic Interventions and Client and Family Teaching chapter describes the uses and workings of psychotropic agents. The latest diagnostic information includes the DSM-IV-TR taxonomy with diagnostic criteria for mental disorders, to enable accurate assessment and diagnosis of patients. Current psychiatric nursing guidelines are based on ANA's 2007 *Psychiatric Mental-Health Nursing*:

Scope and Standards of Practice. Updated 2009-2011 NANDA-I nursing diagnoses assist with accurate diagnoses by including the latest nursing diagnoses related to psychiatric nursing. Updated drug information includes the latest on medications used with psychiatric patients, for optimal drug therapy. [Nursing Interventions Classification \(NIC\)](#)
Springer
Designed to help students learn how to create nursing care plans and effectively document care, this practical book focuses on the nursing plans that are most important, ensuring that students learn what they need to know and that they can find the information they need easily without being distracted by irrelevant information. Packed with easy-to-understand information and focused on helping students develop critical reasoning skills, this respected text presents the most likely nursing diagnoses and collaborative problems with step-by-step guidance on nursing actions and rationales for interventions. More than 85 nursing care plans translate theory into clinical practice. This

exciting revision includes special risk consideration icons called “Clinical Alert” (derived from the most recent IOM report)

that integrate patient-specific considerations into each care plan. Other enhancements include a

streamlined format for easier use; new care plans for maternity, pediatric, and mental health nursing.
