In recent years, developments in experimental philosophy have led many thinkers to reconsider their central assumptions and methods. It is not enough to speculate and introspect from the armchair—philosophers must subject their claims to scientific scrutiny, looking at evidence and in some cases conducting new empirical research. The Theory and Practice of Experimental Philosophy is an introduction and guide to the systematic collection and analysis of empirical data in academic philosophy. This book serves two purposes: first, it examines the theory behind “x-phi,” including its underlying motivations and the objections that have been leveled against it. Second, the book offers a practical guide for those interested in doing experimental philosophy, detailing how to design, implement, and analyze empirical studies. Thus, the book explains the reasoning behind x-phi and provides tools to help readers become experimental philosophers.

Incorporating the thinking, feeling, and behaving dimensions of human experience, the tenth edition of Corey's best-selling book helps students compare and contrast the therapeutic models expressed

in counseling theories. Corey introduces students to the major theories (psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, postmodern, and integrative approaches) and demonstrates how each theory can be applied to two cases (Stan and Gwen). With his trademark style, he shows students how to apply those theories in practice, and helps them learn to integrate the theories into an individualized counseling style. Metafiction begins by surveying the state of contemporary fiction in Britain and America and explores the complex political, social and economic factors which influence critical judgment of fiction. The author shows how, as the novel has been eclipsed by the mass media, novelists have sought to retain and regain a wide readership by drawing on the themes and preoccupations of these forms. Making use of contemporary fiction by such writers as Fowles, Borges, Spark, Barthelme, Brautigan, Vonnegut and Barth, and drawing on Russian Formalist theories of literary evolution, the book argues that metafiction uses parody along with popular genres and non-literary forms as a way not only of exposing the inadequate and obsolescent conventions of the classic novel, but of stuggesting the lines along which fiction might develop in the future.

International Perspectives on the Theory and Practice of Environmental Education: A Reader Guilford Publications

The Theory and Practice of Virtue Education offers the reader a comprehensive and authoritative account of both the theoretical and practical complexities of cultivating virtue in education and beyond. The book moves beyond the usual philosophical literature that merely discusses virtue in the abstract, and offers scholarly, research-informed suggestions for practice. Drawn from a highly successful international conference organised by the Jubilee Centre for Character and Virtues, the chapters in this volume offer a unique insight into the varieties of approaches that leading scholars have identified for putting the learning and nurturing of virtues into practice. Featured are chapters from internationally acclaimed scholars primarily in the fields of philosophy, psychology and education, which are categorised under three headings: philosophical and theoretical foundations for cultivating virtues; developing virtues in practice; and nurturing specific virtues. Beginning with chapters that examine differing theoretical complexities of virtue education, the book then moves on to explore different approaches to nurturing virtue in the classroom and beyond. This practical approach is further evidenced in the final section, where individual virtues are discussed. The Theory and Practice of Virtue Education highlights the theoretical complexity of putting virtue education into practice and, as a result, is of real use to researchers, academics and postgraduates in the fields of education, philosophy, psychology, sociology and theology. It should also be essential reading for educators in character and virtue.

Open Access in Theory and Practice investigates the theory-practice relationship in the domain of open access publication and dissemination of research outputs. Drawing on detailed analysis of the literature and current practice in OA, as well as data collected in detailed interviews with practitioners, policymakers, and researchers, the book discusses what constitutes 'theory', and how

the role of theory is perceived by both theorists and practitioners. Exploring the ways theory and practice have interacted in the development of OA, the authors discuss what this reveals about the nature of the OA phenomenon itself and the theory-practice relationship. Open Access in Theory and Practice contributes to a better understanding of OA and, as such, should be of great interest to academics, researchers, and students working in the fields of information science, publishing studies, science communication, higher education policy, business, and economics. The book also makes an important contribution to the debate of the relationship between theory and practice in information science, and more widely across different fields of the social sciences and humanities

This classic work provides a richly textured overview of the "whys" and "hows" of brief therapy. The authors identify the central features of effective, time-limited interventions for individuals, couples, families, and groups. Taking a developmental approach to treatment, they explain how brief therapy can help at different times in a patient's life, as changes and transitions bring on new stresses and challenges. A practical framework is provided for selecting and screening patients, rapidly finding a

focus for clinical work, and making optimal use of available time. Case examples and extensive transcripts are included to illustrate the use of strategies and techniques drawn from many different psychotherapy perspectives. Throughout, the focus is on creative and efficient ways to help patients build on existing strengths and make desired changes in their interactions with others.
