Socio-economic Atlas of Myanmar Editions Eyrolles

This open access book focuses on the management of transboundary UNESCO World Heritage sites in the Africa region. It highlights the region as a model of best practices on cross-border collaboration in view of enforcing the conservation of the site, engaging with local communities, and fighting against (in some cases) extremist groups inhabiting these sites. It also addresses the role of the World Heritage Convention in promoting transboundary cooperation and offers both an analysis and a list of priorities for improving the effective management of transboundary properties in sub-Saharan Africa defined. This book presents chapters from experts, site managers, technical and financial partners, academics, and representatives of the private sector from 20 African countries and 15 institutions involved in African heritage management. It provides an opportunity to share current and planned initiatives at the transboundary sites inscribed on the UNESCO World Heritage List, including the Maloti-Drakensberg Park (South Africa, Lesotho), W-Arly-Pendjari Complex (Benin, Burkina Faso, Niger), Sangha Trinational (Cameroon, Congo, Central African Republic), and Mosi-oa-Tunya / Victoria Falls (Zambia, Zimbabwe). The publication further discusses African sites that could eventually be proposed for extension or nomination to the UNESCO World Heritage List in collaboration with the local and indigenous communities. This book is suitable for heritage specialists and readers interested in cross-border collaborations.

"Voici un atlas d'anatomie conçu dès son origine pour devenir un outil essentiel pour les étudiants, les enseignants, les praticiens. La présentation en vis-à-vis sur deux pages, organisée autour d'une matière, permet une approche complète d'un seul coup d'œil. 1734 illustrations en tout, assemblées dans un ordre logique, facilitent la compréhension. Des centaines d'exemples cliniques fournissent immédiatement des indications pratiques et pertinentes sur les concepts anatomiques étudiés. L'intégration d'illustrations topographiques, système par système, et des vues schématiques renforcent le rapport étroit entre structure et fonction. Tous ces atouts font de 'Prométhée' l'ouvrage de référence pour l'étude de l'anatomie au XXI^e siècle." -- Site web de l'éditeur

Plus de trente-trois ans après l'avènement de la République islamique, qu'en est-il des flux migratoires iraniens dans le monde ? Quelle est la répartition des Iraniens en dehors de l'Iran ? Peut-on vraiment chiffrer avec précision la diaspora iranienne ? Cet ouvrage a pour but de répondre à ces questions en dressant un bilan quantitatif de cette diaspora sur la base de recherches qui s'étendent sur une dizaine d'années. En 2011, d'après certaines sources officielles, nous pouvons l'évaluer à environ 4 000 000 d'individus, ce qui correspond à 5,3 % de la population en Iran. Dispersés dans huit pôles d'attraction, les Iraniens hors d'Iran constituent une population régulière (environ 3 000 000 de personnes) et une "population flottante", formée par les déboutés des demandes de régularisation, les sans-papiers et les irréguliers (environ 1 000 000). Cette diaspora regroupe quatre générations d'Iraniens ayant émigré à l'étranger, ainsi que leurs descendants, nés en Iran ou non, s'identifiant encore à leur origine iranienne. La structure non démocratique de l'Etat iranien, les huit années de guerre, la transformation démographique de la population iranienne, l'ingérence du religieux dans la vie quotidienne et la frustration des Iraniens en ce qui concerne le développement humain, pourvoyeur de la liberté donnant à chacun la possibilité de vivre sa vie comme il l'entend, sont des facteurs structurels et individuels de la reproduction sociologique de cette diaspora.

Drawing on research from biodiversity experts around the world, this book reflects the diversity of forest types and forest issues that concern forest scientists. Coverage ranges from savannah and tropical rainforests to the ancient oak forests of Poland; issues explored include the effects of logging, management practices, forest dynamics and climate change on forest structure and biodiversity. Here is a useful overview of current science, for researchers and educators alike.

Forest Diversity and Management Franz Steiner Verlag Wiesbaden GmbH

Knowledge of scientific and technological developments, and the flexible communication and decision making, knowledge sharing, and collaboration that stem from them, can enable organizations and individuals to be successful and viable competitors in today's global economy. Information Systems and Technology for Organizational Agility, Intelligence, and Resilience aims to advise and support organizational agents who want ensure success in terms of financial, social, and environmental aspects, as well as in the aspect of human development, in a more sustainable way. The premier reference work provides examples of conceptual research, methodologies, empirical cases, and success cases for academics, researchers, intermediaries, and organizations looking to use information systems and technology to boost their agility, intelligence, and resilience.

A London Bibliography of the Social Sciences Times Books Limited

This book examines how legal systems and mechanisms give shape to the capitalist economic system. In this regard, it focuses on the most important of these systems, such as monetary and financial law, company law, fiscal law, contract and labour law. Further, the book provides a thorough analysis of the underlying ethical values of said legal systems and mechanisms. It also gives an overview of several potentially devastating related effects, such as poverty, the increasing polarisation between rich and poor, climate change, and mounting debts at both the public and private level. The book concludes by presenting proposals for change. Given its critical analysis of legal systems and mechanisms in connection with the value choices dictated by economic ideologies, the book will be of particular interest to legal and economic academics, researchers and students, but also to policymakers, and, more generally, to anyone with a genuine concern for how the socio-economic order will evolve. Managing Transnational UNESCO World Heritage Sites in Africa De Boeck Superieur

Fifty years after the conclusion of the Treaties of Rome (25 March 1957) and the foundation of the European Economic Community, Brussels has become a political world city and international

capital with global influence. The acta of the interuniversity and international colloquium, held in Brussels on 18 and 19 December 2006, present a general outline of the research results and 26 contributions, based on original research and divided into three parts. The first part focuses on Brussels' position in the 'world city network'. How has Brussels grown into the European and international 'capital' we know today? What exactly is its legal status as the European 'Capital'? Of course, other aspects such as the relationship between the Brussels-Capital Region and the Europe of Regions and the role of Brussels as the place for lobbying the European Union are also examined. The second part focuses on the interaction between the European institutions and Brussels. What are the socioeconomic, demographic, political and linguistic effects of their presence? Finally, a number of pressure points and areas of tension are analysed. How is Brussels 'imagined' or represented as the capital of Europe? And what is the impact of the European presence on urban planning and security policy? -- Back cover.

Ce rapport a été élaboré à partir de divers produits de connaissance et matériels de formation regroupés sous l'appellation « eAtlasimprimé », qui ont été développés et partagés avec les organisations de la société civile (OSC) dans le cadre du programme Voice for Change Partnership (V4CP). The Times Atlas and Encyclopaedia of the Sea Springer Maps capture data expressing the economic complexity of countries from Albania to Zimbabwe, offering current economic measures and as well as a guide to achieving prosperity Why do some countries grow and others do not? The authors of The Atlas of Economic Complexity offer readers an explanation based on "Economic Complexity," a measure of a society's productive knowledge. Prosperous societies are those that have the knowledge to make a larger variety of more complex products. The Atlas of Economic Complexity attempts to measure the amount of productive knowledge countries hold and how they can move to accumulate more of it by making more complex products. Through the graphical representation of the "Product Space," the authors are able to identify each country's "adjacent possible," or potential new products, making it easier to find paths to economic diversification and growth. In addition, they argue that a country's economic complexity and its position in the product space are better predictors of economic growth than many other well-known development indicators, including measures of competitiveness, governance, finance, and schooling. Using innovative visualizations, the book locates each country in the product space, provides complexity and growth potential rankings for 128 countries, and offers individual country pages with detailed information about a country's current capabilities and its diversification options. The maps and visualizations included in the Atlas can be used to find more viable paths to greater productive knowledge and prosperity. The Socio-Economic Atlas of Myanmar focuses on the analysis and evaluation of regional differences in geographical conditions, natural resources, infrastructure and, in particular, the socio-economic development in the states and regions of the country in the current transformation process of Myanmar. The Atlas is based on international literature, statistical data, qualitative research and spatial information in a Geographic Information System on Myanmar. The spatial analyses aim to increase the state of knowledge about Myanmar both within the country and abroad, and to support decision-making on spatial development policy.
