Günter Koschorrek wrote his illicit diary on any scraps of paper he could lay his hands on, storing them with his mother on infrequent trips home on leave. The diary went missing, and it was not until he was reunited with his daughter in America some forty years later that it came to light and became Blood Red Snow. The author's excitement at the first encounter with the enemy in the Russian Steppe is obvious. Later, the horror and confusion of fighting in the streets of Stalingrad are brought to life by his descriptions of the others in his unit — their differing manners and techniques for dealing with the squalor and death. He is also posted to Romania and Italy, assignments he remembers fondly compared to his time on the Eastern Front. This book stands as a memorial to the huge numbers on both sides who did not survive and is, some six decades later, the fulfilment of a responsibility the author feels to honour the memory of those who perished.

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

A REESE'S BOOK CLUB PICK THE NEW YORK TIMES BESTSELLER ONE OF THE NEW YORK TIMES BEST THRILLERS OF THE YEAR "I loved this book. It gave me the same waves of happiness I get from curling up with a classic Christie...The alternating points of view keep you guessing, and guessing wrong." — Alex Michaelides, #1 New York Times bestselling author of The Silent Patient "Evok[es] the great Agatha Christie classics...Pay close attention to seemingly throwaway details about the characters' pasts. They are all clues." -- New York Times Book Review A wedding celebration turns dark and deadly in this deliciously wicked and atmospheric thriller reminiscent of Agatha Christie from the New York Times bestselling author of The Hunting Party. The bride - The plus one - The best man - The wedding planner - The bridesmaid - The body On an island off the coast of Ireland, guests gather to celebrate two people joining their lives together as one. The groom: handsome and charming, a rising television star. The bride: smart and ambitious, a magazine publisher. It's a wedding for a magazine, or for a celebrity: the designer dress, the remote location, the luxe party favors, the boutique whiskey. The cell phone service may be spotty and the waves may be rough, but every detail has been expertly planned and will be expertly executed. But perfection is for plans, and people are all too human. As the champagne is popped and the festivities begin, resentments and petty jealousies begin to mingle with the reminiscences and well wishes. The groomsmen begin the drinking game from their school days. The

bridesmaid not-so-accidentally ruins her dress. The bride's oldest (male) friend gives an uncomfortably caring toast. And then someone turns up dead. Who didn't wish the happy couple well? And perhaps more important, why?

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she? Darkly comic, startlingly poignant, and utterly original -- this is Kate Atkinson at her absolute best.

Dirk Renswoude is a craftsman and loner of noble birth who has been mistreated by his family. He meets Thierry, a young scholar on his way to study at the university at Basle and they soon discover that they share a fascination with the black arts. Thierry is initially cautious and afraid of blasphemy, whilst Dirk is ambitious and thirsts for power. Dirk leads them on to experiments with mystic circles drawn on the floor in chalk, the chanting of arcane incantations and the evocation of grotesque, demonic visions writhing in the speculum.

Glimpses of World History Biomass Energy Foundation

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.

From agriculture to big business, from medicine to politics, The Cigarette Century is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. The Cigarette Century shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

The first and most terrifying monster in English literature, from the great early epic Beowulf, tells his own side of the story in this frequently banned book. This classic and much lauded retelling of Beowulf follows the monster Grendel as he learns about humans and fights the war at the center of the Anglo Saxon classic epic. This is the book William Gass called "one of the finest of our contemporary fictions."

The Wrath of Napolo Forever

This 'dream-laden and spooked' (Marina Warner, London Review of Books) story is to many one of the best-loved books of the twentieth century. Munthe spent many years working as a doctor in Southern Italy, labouring unstintingly during typhus, cholera and earthquake disasters. It was during

this period that he came across the ruined Tiberian villa of San Michele, perched high above the glittering Bay of Naples on Capri. With the help of Mastro Nicola and his three sons, and with only a charcoal sketch roughly drawn on a garden wall to guide them, Munthe devoted himself to rebuilding the house and chapel. Over five long summers they toiled under a sapphire-blue sky, their mad-cap project leading them to buried skeletons and ancient coins, and to hilarious encounters with a rich cast of vividly-drawn villagers. The Story of San Michele reverberates with the mesmerising hum of a long, hot Italian summer. Peopled with unforgettable characters, it is as brilliantly enjoyable and readable today as it was upon first publication. The book quickly became an international bestseller and has now been translated into more than 30 languages; it is today an established classic, and sales number in the millions.

A Simple Account of the World History 'Glimpses of the World History' is an account of the progress of the world through centuries and ages. This book is a collection of letters that Jawaharlal Nehru wrote to his daughter Indira when he was in various Indian prisons for three years. The letters were meant to introduce her to the world and its history. In the first few letters, Nehru expresses his sadness for not being able to be around his daughter and give her the materialistic gifts that other parents could but he promises to give her a gift that he could afford; in the form of knowledge and wisdom through words that come from the very core of his heart. Nehru wrote 196 letters and covered the history of mankind from 6000 BC to the time he was writing the letters. Tales of Empires A major part of these letters talks extensively about the rise and fall of empires around the world and development of civilizations as well. Nehru talks about the histories of every significant place ranging from Greece in the far West to China in the east. The book talks about the wars that were fought during these years and the greatest revolutions that overthrew established dynasties. Nehru has also

written about the legendary leaders and kings who have walked the earth including right from Alexander the Great to Mahatma Gandhi. A Different View Unlike many other books that talk more or less about particular history of specific cultures, this book is a panoramic view of the history of mankind. It talks about the barbarians as well as the well behaved societies in the far west. Nehru has written this book with lot of wit which makes it an interesting read.

In the last few decades, yoga has helped millions of people to improve their concepts of themselves. Yoga realises that man is not only the mind, he is body as well. Yoga has been designed in a such a way that it can complete the process of evolution of the personality in every possible direction. Kundalini yoga is a part of the tantric tradition. Even though you may have already been introduced to yoga, it is necessary to know something about tantra also. Since the dawn of creation, the tantrics and yogis have realised that in this physical body there is a potential force. It is not psychological or transcendental; it is a dynamic potential force in the material body, and it is called Kundalini. This Kundalini is the greatest discovery of tantra and yoga. Scientists have begun to look into this, and a summary of the latest scientific experiments is included in this book.

A haunting fable of art, family, and fate from the author of the Outline trilogy. A woman invites a famous artist to use her guesthouse in the remote coastal landscape where she lives with her family. Powerfully drawn to his paintings, she believes his vision might penetrate the mystery at the center of her life. But as a long, dry summer sets in, his provocative presence itself becomes an enigma—and disrupts the calm of her secluded household. Second Place, Rachel Cusk's electrifying new novel, is a study of female fate and male privilege, the geometries of human relationships, and the moral questions that animate our lives. It reminds us of art's capacity to uplift—and to destroy.
