Questionner le monde

CP A&C Black

Slimy Snail takes a trip around the yard, overcoming different obstacles on the way.

Questionner le monde

CP Capstone Classroom

Un cahier "tout en un" qui permet d'accompagner et de mettre en oeuvre la démarche scientifique avec : 14 leçons, pour traiter l'ensemble des thèmes des programmes : "La matière", "Le monde vivant" et "Les objets techniques". Des activités claires, basées sur l'observation de documents variés, l'interrogation, la formulation d'hypothèses,

la recherche et l'expérimentation. Un schéma de synthèse (du type "carte mentale") à la fin de chaque leçon pour retenir l'essentiel et mémoriser les savoirs et le lexique importants. Une mascotte pour aider les élèves à s'interroger sur le monde qui les entoure et à travailler sur des compétences orales. Des activités interdisciplinaires pour créer du lien entre les sciences et les mathématiques.

Clothes Make the Man

Basic Books

Exceptionally strong skills training with a particular focus on speaking - that's what you get with Family and Friends.How?The clear methodology, with objectives for every lesson, and carefully

staged activities support your students learning. So does the controlled 'Skills Time' program, which enables your students to continually improve their listening, speaking and literacy skills. Phonics is straightforward and fun! The progression is specially written for non-native speakers, meaning each sound is taught in a way that's easy to understand. The writing activities are very well structured and help you teach students essential sub-skills, such as punctuation, so they feel ready to do their own personalized writing in the Workbook and worksheets from the Teacher's Resource CD. The picture dictionary and wordlists at the back of the book offer students additional

support for reading and writing activities. The wide variety of linked print and digital resources helps you to meet the needs of students with different learning styles and makes your lessons more engaging. The teacher's resource CD is packed full of photocopiable resources such as values worksheets, extra writing pages and cut and make activities. Do you need help preparing for tests? There are print-ready and editable tests with audio on the Teacher's Resource CD along with practice papers for Cambridge Young Learners English Tests which you can print and use, or customize to practice a particular language point or to suit mixed ability classes. But Family and Friends is not only about academic success - it develops the whole child too. The values syllabus helps children develop social and emotional skills which guarantee success in the classroom and at home.

Gus's Garage University of Chicago Press
Gus's workshop is chockful of useless odds and ends. But when his friend Rico comes over with a problem - his scooter seat is way too small for a rhino - Gus finds just the

thing to solve it. He creates a fabulous new vehicular contraption with an old lounge chair! One by one Gus's friends bring him their vehicles and Gus solves their troubles with ingenious solutions - a cooling system made with a fridge that doubles as an ice-cream machine, a burst of speed from a rocket blaster. Soon the workshop is almost empty, but the last scraps might be just enough to solve Gus's own problem at the end of a long day.

Dinosaur Farm St. Martin's Press
Georges-Louis Buffon, an eighteenth-century French scientist, was the first to promote the widespread idea that nature in the New World was deficient; in America, which he had never visited, dogs don't bark, birds don't sing, and—by extension—humans are weaker, less intelligent, and less potent. Thomas Jefferson, infuriated by these claims, brought a seven-foot-tall carcass of a moose from America to the entry hall of his Parisian hotel, but the five-foot-tall Buffon remained unimpressed and refused to change his views on America's inferiority. Buffon, as Philippe Roger demonstrates here, was just one of the first in a long line of Frenchmen who have built a history of anti-Americanism in that country, a progressive history that is alternately

ludicrous and trenchant. The American Enemy is Roger's bestselling and widely acclaimed history of French anti-Americanism, presented here in English translation for the first time. With elegance and good humor, Roger goes back 200 years to unearth the deep roots of this anti-Americanism and trace its changing nature, from the belittling, as Buffon did, of the "savage American" to France's resigned dependency on America for goods and commerce and finally to the fear of America's global domination in light of France's thwarted imperial ambitions. Roger sees French anti-Americanism as barely acquainted with actual fact; rather, anti-Americanism is a cultural pillar for the French, America an idea that the country and its culture have long defined themselves against. Sharon Bowman's fine translation of this magisterial work brings French anti-Americanism into the broad light of day, offering fascinating reading for Americans who care about our image abroad and how it came about. "Mr. Roger almost single-handedly creates a new field of study, tracing

the nuances and imagery of anti-Americanism in France over 250 years. He shows that far from being a specific reaction to recent American policies, it has been knit into the very substance of French intellectual and cultural life. . . . His book stuns with its accumulated detail and analysis."—Edward Rothstein, New York Times "A brilliant and exhaustive guide to the history of French Ameriphobia."—Simon Schama, New Yorker
The Tiger-Skin Rug Routledge
 Boxer went to town to look for food. He saw fish in the fish and stole one! But because he was greedy he went hungry.
Snail Trail Routledge
 In Justice and Law María José Falcón y Tella, offers an account of classical and modern theories of justice, and some of the principal themes relating to justice –punishment, civil disobedience, conscientious objection, just war, and tolerance.
Code de la Nature Capstone Classroom
 How do you convey to your students, colleagues and friends some of the beauty of the kind of mathematics you are obsessed with? If you are a mathematician

interested in finite or topological geometry and combinatorial designs, you could start by showing them some of the (400+) pictures in the "picture book". Pictures are what this book is all about; original pictures of everybody's favorite geometries such as configurations, projective planes and spaces, circle planes, generalized polygons, mathematical biplanes and other designs which capture much of the beauty, construction principles, particularities, substructures and interconnections of these geometries. The level of the text is suitable for advanced undergraduates and graduate students. Even if you are a mathematician who just wants some interesting reading you will enjoy the author's very original and comprehensive guided tour of small finite geometries and geometries on surfaces. This guided tour includes lots of stereograms of the spatial models, games and puzzles and instructions on how to construct your own pictures and build some of the spatial models yourself.

Cultural Histories of Noise, Sound and Listening in Europe, 1300-1918 presents a range of historical case studies on the sounding worlds of the European past. The chapters in this volume explore ways of thinking about sound historically, and seek to understand how people have understood and negotiated their relationships with the sounding world in Europe from the Middle Ages through to the early twentieth century. They consider, in particular: sound and music in the later Middle Ages; the politics of sound in the early modern period; the history of the body and perception during the Ancien Régime; and the sounds of the city in the nineteenth century and sound and colonial rule at the fin de siècle. The case studies also range in geographical orientation to include considerations not only of Britain and France, the countries most considered in European historical sound studies in English-

language scholarship to date, but also Bosnia-Herzegovina, British Colonial India, Germany, Italy and Portugal. Out of this diverse group of case studies emerge significant themes that recur time and again, varying according to time and place: sound, power and identity; sound as a marker of power or violence; and sound, physiology and sensory perception and technologies of sound, consumption and meaning.
