Laura Caxton vowed never to face them again. The horror of what the vampires did is too close, the wounds too fresh. But when Jameson Arkeley, broken and barely recognizable, comes to her with an unfathomable, unholy discovery, her resolve crumbles. Arkeley leads Caxton to a tomb in Gettysburg recently excavated by a local archaeology professor. While the town, with its legendary role in the Civil War's worst battle, is no stranger to

cemeteries, this one is remarkably, eerily different. In it lie 100 coffins—99 of them occupied by vampires, who, luckily, are missing their hearts. But one of the coffins is empty and smashed to pieces. Who is the missing vampire? Does he have access to the 99 hearts that, if placed back in the bodies of their owners, could reanimate an entire bloodthirsty army? How did the vampires end up there, undisturbed and undiscovered for 150 years? The answer lies in Civil War documents that contain sinister secrets about the newly found coffins—secrets that Laura Caxton is about to uncover as she is thrown into a deadly, gruesome mission of saving an entire town from a mass invasion of the undead. . . .

\_\_\_\_\_ As well as being an incredible stage performer, a brilliant writer and a talented painter, Derren Brown is also a fantastic street photographer. Here, for the first time, is a selection of his work. As he writes of his passion: 'Street photography is a fitting refuge for those who look at life from a distance. It both sanctifies our remoteness (by offering the standpoint of the observer) and challenges it, insisting we approach with a spritely curiosity. It offers a safe route back into the world: the camera is an entry ticket to daunting social situations and extraordinary environments where we might

otherwise feel entirely out of place. Suddenly we have a role: a reason to be present. And for those of us smitten by its appeal, it provides a means of fortifying and forgetting ourselves, while extending out into the world with a controlled compassion.'

In *Performing Deception*, Brian Rappert reconstructs the practice of entertainment magic by analysing it through the lens of perception, deception and learning, as he goes about studying conjuring himself. Through this novel meditation on reasoning and skill, Rappert elevates magic from the undertaking of mere trickery to an art that offers the basis for rethinking our possibilities for acting in the modern world. *Performing Deception* covers a wide range of theories in sociology, philosophy, psychology and elsewhere in order to offer a striking assessment of the way secrecy and deception are woven into social interactions, as well as the illusionary and paradoxical status of expertise.

Insight is the superpower that drives innovation and enables us to understand the world from other peoples' points of view, be they customers or colleagues, advocates or competitors. This new

book from data storyteller Sam Knowles explains how to ask smarter questions – questions that, by design, stimulate more useful answers. This is the shortcut to better productivity, fast-tracked innovation, and organisational success – for businesses, universities, charities, and governments. For too long, the simple act of asking questions has been overlooked as almost too trivial to contemplate. *Asking Smarter Questions* seeks to champion the art of curiosity by setting out a framework to make every question count. The fundamental building blocks of insight are data and information, joined together in new and often unpredictable ways. The way we surface new data and information and make meaningful connections between data points is by asking smarter questions. By taking this approach, you can make your organisation a less confrontational, more collaborative, and more productive environment in which to work – particularly in the more distributed and remote settings that will characterise the 2020s. Managers, directors, and leaders will find the universal principles, expert interviews, and data-driven recommendations a source of inspiration to share with their teams. *Asking Smarter Questions* is aimed at professionals in businesses and organisations across all sectors, and will help those working in many functions, including market research, intelligence, insight, analytics, strategy, marketing, communications, planning, product development, and innovation. *The American Catalogue ... This book examines the work of psychological illusionist Derren Brown to understand the significance of storytelling and ancient philosophy in our society. Reflecting on the social disconnection

and political polarisation of recent times, Darren Kelsey considers how we can rebuild a sense of collective cohesion and common good, weaving together contemporary psychology with ancient Stoicism to cut through the noise of modern life. Kelsey shows that Brown is more than a stage performer: he's an enlightened magician who offers us guidance for navigating the challenges life throws at us, using his skills and wisdom to help us better understand ourselves and enable human flourishing. In this rigorous examination of Brown's work, Kelsey makes a compelling case for paying closer attention to our personal, cultural and political stories and beliefs to help create a better future – for ourselves, our communities, and the planet.

The Sunday Times Bestseller 'Really brilliant and just crammed with wisdom and insight. It will genuinely make a difference to me and the way I think about myself.' Stephen Fry \_\_\_ Everyone says they want to be happy. But that's much more easily said than done. What does being happy actually mean? And how do you even know when you feel it? In Happy Derren Brown explores changing concepts of happiness - from the surprisingly modern wisdom of the Stoics and Epicureans in classical times right up until today, when the self-help industry has attempted to claim happiness as its own. He shows how many of self-help's suggested routes to happiness and success - such as positive thinking, self-belief and setting goals - can be disastrous to follow and, indeed, actually cause anxiety. Happy aims to reclaim happiness and to enable us to appreciate the good things in life, in all their transient glory. By taking control of the stories we tell

ourselves, by remembering that 'everything's fine' even when it might not feel that way, we can allow ourselves to flourish and to live more happily. \_\_\_ What readers are saying: \*\*\*\*\* 'Immensely positive and life-affirming' \*\*\*\*\* 'This is the blue print to a good life' \*\*\*\*\* 'Thought provoking and potentially life-changing.'

Brilliant . . . crammed with wisdom and insight.' Stephen Fry on Happy In A Little Happier Derren Brown draws out the essential discoveries from his international bestseller Happy to help you lead your happiest life. Life is hard, messy and complex. But if we can learn to separate what we can control - our thoughts and actions - from all else beyond our control, we can find a surer footing with which to greet the world and experience our own concept of happiness. - None of this is real when each of us tells stories about our lives in too tidy narratives that are seldom true and rarely helpful. - We should be wary of goal setting: long-term goals fixate us on a future that may not happen and we may not wish for when we get there. - Our partner isn't right for us because no-one is. None of us is born for someone else. But perhaps those areas of frequent conflict are useful indicators of where we might ourselves be insufferable. A Little Happier's 17 inspiring and reassuring lessons will help you define and find your own happiness. Its lessons challenge us to think differently about the meaning of happiness and how we can overcome anxiety in a difficult world. \*\*\*\*\* 'A no nonsense guide to seeing and appreciating the world we live in.' \*\*\*\*\* 'A brilliant, insightful and clear book. A beautiful accompaniment to Happy.' \*\*\*\*\* 'This book will have a big impact on people who suffer with anxiety and depression. A must read.'

In 'The Spectacle of Illusion', professional magician-turned experimental psychologist Dr. Matthew L. Tompkins investigates the arts of deception as practised and popularised by mesmerists, magicians and psychics since the early 18th century. Organised thematically within a broadly chronological trajectory, this compelling book explores how illusions perpetuated by magicians and fraudulent mystics can not only deceive our senses but also teach us about the inner workings of our minds. Indeed, modern scientists are increasingly turning to magic tricks to develop new techniques to examine human perception, memory and belief.0Beginning by discussing mesmerism and

spiritualism, the book moves on to consider how professional magicians such as John Nevil Maskelyne and Harry Houdini engaged with these movements ? particularly how they set out to challenge and debunk paranormal claims. It also relates the interactions between magicians, mystics and scientists over the past 200 years, and reveals how the researchers who attempted to investigate magical and paranormal phenomena were themselves deceived, and what this can teach us about deception. 00Exhibition: Wellcome Collection, London, UK (11.04.-15.09.2019).

The Supernatural Index is the first index to all known anthologies of supernatural, fantasy, and weird fiction. It covers over 2,100 such books, indexing each volume by contents, author, and title. Books range from 1813 to date and therefore provide a complete history of the horror fiction field. Birth and death dates, along with pseudonyms, are provided for more than 7,700 authors; and for all the roughly 21,300 stories, every attempt has been made to provide original publication details. Supernatural fiction continues to be of interest to modern readers, though many of the most frequently anthologized ghost stories were written during the Victorian era. Because so much supernatural fiction has been published as short stories, anthologies have long been a useful means of bringing supernatural literature to the readers. This reference is the first index to all known anthologies of supernatural, fantasy, and weird fiction. Included are entries for more than 2,100 anthologies from 1813 to the present. Many of

these anthologies have never been listed previously in bibliographies, and the volume even includes citations for rare Victorian works. Entries provide original publication sources for reprinted stories, including many from obscure magazines not previously indexed. The book also provides birth and death dates and pseudonyms for more than 7,700 authors of supernatural fiction. Citations may be accessed by editor, author, book title, or story title. Also included is a listing of the contents of each anthology.
