Business Law and Economics for Civil Law Systems highlights the relevance of economic analysis of business law from a civilian perspective. It integrates a comparative approach (common law and civil law) to economic analysis using tools and illustrations to assist in conducting critical economic analysis of rules in the field of business law. This book is a valuable contribution to the reflection on the place and meaning of value creation and accountability as goals for business law. It will be of great value to academics interested in business law, competition law, comparative law and legal theory, students studying law, business and economics, and to policy makers and regulators.

Theorising Normalcy and the Mundane

As the Spanish were preparing to leave colonized Western Sahara in 1975, Morocco invaded, sparking a war with the Western Saharan Polisario Front. About 70% of Western Sahara was occupied by Morocco, which stations up to 140,000 soldiers in the territory, primarily along a 1700 kilometre long sand berm that is protected by one of the world's largest fields of landmines. In 1991, Morocco and the Polisario Front agreed to a truce ahead of a referendum on Western Sahara's future. However, Morocco has since refused to allow the referendum to take place, and has begun the extensive exploitation of Western Sahara's non-renewable natural resources. This has both highlighted the plight of the Saharawi people who live in refugee camps in

Algeria and in occupied Western Sahara, and pushed the Polisario Front back to a position where it is openly canvassing for a return to war. This book was originally published as a special issue of Global Change, Peace and Security.

Economic corridors—ambitious infrastructural development projects that newly liberalizing countries in Asia and Africa are undertaking—are dramatically redefining the shape of urbanization. Spanning multiple cities and croplands, these corridors connect metropolises via high-speed superhighways in an effort to make certain strategic regions attractive destinations for private investment. As policy makers search for decentralized and market-oriented means for the transfer of land from agrarian constituencies to

infrastructural promoters and urban developers, the reallocation of property control is erupting into volatile land-based social conflicts. In *Shareholder Cities*, Sai Balakrishnan argues that some of India's most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally strong agrarian propertied classes directly encounter financially powerful incoming urban firms. Balakrishnan focuses on the first economic corridor, the Mumbai-Pune Expressway, and the construction of three new cities along it. The book derives its title from a current mode of resolving agrarian-urban conflicts in which agrarian landowners are being transformed into shareholders in the corridor cities, and the distributional implications of these new land transformations. Shifting the focus of the study of India's contemporary urbanization away from megacities to these in-between corridor regions, Balakrishnan explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence of agrarian propertied classes as protagonists in the making of urban real estate markets. *Shareholder Cities* highlights the possibilities for a democratic politics of inclusion in which agrarian-urban encounters can create opportunities for previously excluded groups to stake new claims for themselves in the corridor regions.

Financial Regulation and Civil Liability in European Law Oxford Handbooks
Emerging from the internationally recognised Theorising Normalcy and the Mundane conference series, the chapters in this book offer wide-ranging critiques of that most pervasive of ideas, 'normal'. In particular, they explore the precarious positions we are presented with and, more often than not, forced into by 'normal', and its operating system, 'normalcy' (Davis, 2010). They are written by activists, students, practitioners and academics and offer related but diverse approaches. Importantly, however, the chapters also ask, what if increasingly precarious encounters with, and positions of, marginality and non-normativity offers us a chance (perhaps the chance) to critically explore the possibilities of 'imagining otherwise'? The book questions the privileged position of 'non-normativity'; in youth and unpacks the expectation of the 'normal' student in both higher and primary education. It uses the position of transable people to push the boundaries of 'disability', interrogates the psycho-emotional disablism of box-ticking bureaucracy and spotlights the 'urge to know' impairment. It draws on cross-movement and cross-disciplinary work around disability to explore topics as diverse as drug use, The Bible and relational autonomy. Finally, and perhaps most controversially, it explores the benefits of (re)instating 'normal'. By paying attention to the opportunities presented amongst the fissures of critique and defiance, this book offers new applications and perspectives for thinking through the most ordinary of ideas, 'normal'.

Public stock markets are too small. This book is an effort to rescue public stock markets in the EU and the US. There should be more companies with publicly-traded shares and more direct share ownership. Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US, the book proposes ways to create a new regulatory regime designed to help firms and facilitate people's capitalism. Through its comparative and historical study of regulation and legal practices, the book helps to understand the evolution of public

stock markets from the nineteenth century to the present day. The book identifies design principles that reflect prior regulation. While continental European company law has produced many enduring design principles, the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors. The book therefore proposes a new set of design principles to serve contemporary societal needs.

This is the first book to focus entirely on the under-researched but crucial topic of women in the work of J. M. Coetzee, generally regarded as one of the world's most significant living writers. The fourteen essays in this collection raise the central issue of how Coetzee's texts address the 'woman question'. There is a focus on Coetzee's representation of women, engagement with women writers and the ethics of what has been termed his 'ventriloquism' of women's voices in his fiction and autobiographical writings, right up to his most recent novel, *The Schooldays of Jesus*. As such, this collection makes important links between the disciplines of literary and gender studies. It includes essays by well-known Coetzee scholars as well as by emerging scholars from around the world, providing fascinating and timely global insights into how his works are read from differing cultural and scholarly perspectives.

Across the world, higher education is witnessing exponential growth in both student participation and types of educational providers. One key phenomenon of this growth is an increase in student diversity: governments are widening access to higher education for students from traditionally underrepresented groups. However, this raises questions about whether this rapid growth may in face compromise academic quality. This book presents case studies of how higher education institutions in diverse countries are maintaining academic excellence while increasing the access and participation of students from historically underrepresented backgrounds. Including case studies spanning four continents, the authors and editors examine whether increasing widening participation positively impacts upon academic quality. This volume will be of interest and value to students and scholars of global higher education, representation and participation in education, and quality in higher education.

Crowdfunding Oxford University Press Although there has been a University of Chester only since 2005, its predecessor, Chester College, dates back further than most UK universities, to 1839. This book celebrates the 175th anniversary of the foundation in 2014. The story is a remarkable one of survival and success. The early College was a pioneering venture with a unique approach to learning and the University still houses the first buildings in England specifically designed for the training of teachers.

Three times, in the 1860s, the 1930s and the 1970s, Chester College came near to closure, only repeatedly to emerge intact and to become stronger than before. In the early twenty-first century, the University has a growing reputation within the higher education sector and can claim some of the highest rates of student satisfaction in the country. The book's title is taken from the College motto of the late-Victorian and Edwardian period: as appropriate today as when it was coined.

This book explores convergences of legal doctrine despite jurisdictional, cultural and political barriers, as well as divergences due to such barriers, examining topics that are of vital importance to contemporary legal scholars. Written by leading experts from all continents, its 26 chapters present a comparative analysis of cutting-edge legal issues of the 21st century. While each of the countries covered stands alone as a sovereign state, in a technologically advanced world their disparate systems nonetheless show comparable strategies in dealing with complex legal issues. Several of the chapters show how, in addition to state normative production and state adjudication, a growing panoply of non-state instruments and non-state adjudication are becoming more and more central to the legal field. This book is a key addition to the library of any scholar wanting to keep abreast of the major

trends in contemporary law. Representing the current state of law in a vast range of areas, it covers each topic from a comparative perspective. Cet ouvrage, en examinant des sujets d'une importance vitale pour les juristes contemporains, traite des convergences de la doctrine juridique malgré les barrières juridictionnelles, culturelles et politiques ainsi que des divergences dues à ces barrières. Écrits par d'éminents universitaires de tous les continents, ses 26 chapitres présentent une analyse comparative de sujets juridiques majeurs du 21e siècle. Dans un monde technologiquement avancé, bien que chaque pays analysé dans cet ouvrage demeure autonome en tant qu'État souverain, l'ensemble des systèmes disparates présente néanmoins des stratégies comparables pour traiter des questions juridiques complexes. En outre, plusieurs chapitres montrent comment, en plus de la production normative et de la résolution des différends étatiques, la panoplie croissante de différents types d'instruments non étatiques et de résolution non étatique des différends devient de plus en plus centrale dans la sphère juridique. Cet ouvrage est un ajout essentiel à la bibliothèque de tout universitaire souhaitant se tenir au courant des principales tendances du droit contemporain. Il couvre un vaste domaine de sujets traités d'un point de vue comparatif et représente l'état actuel du droit dans chaque domaine.
