**The Chartered Secretary** Schenkman Publishing Company  
The RoutledgeFalmer Reader in Sociology of Education brings together a carefully selected collection of articles and book chapters to reflect enduring trends in the field of Sociology of Education. Focusing on the major issues confronting education today, this lively and informative Reader provides broad coverage of the field and includes sections on crucial topics such as: social class globalization gender curriculum social inequality and social justice students and classrooms. With an emphasis on contemporary pieces that deal with issues relevant to the immediate real world, this book represents the research and views of some of the most respected authors in the field today. Stephen Ball offers a collection that is theoretically informed, internationally applicable, and universally accessible. In a

specially written introduction, Ball provides a much-needed context to the current educational climate. Students of sociology and sociology of education will find this Reader an important route map to further reading and understanding.

### **Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century** Springer

Textile Technology and Design addresses the critical role of the interior at the intersection of design and technology, with a range of interdisciplinary arguments by a wide range of contributors: from design practitioners to researchers and scholars to aerospace engineers. Chapters examine the way in which textiles and technology - while seemingly distinct - continually inform each other through their persistent overlapping of interests, and eventually coalesce in the practice of interior design. Covering all kinds of interiors from domestic (prefabricated kitchens and 3D wallpaper) to extreme (underwater habitats and space stations), it features a variety of critical aspects including pattern and ornament, domestic technologies, craft and the imperfect, gender

issues, sound and smart textiles. This book is essential reading for students of textile technology, textile design and interior design.

**Skilled Labour and Future Needs** Chandos Publishing

This volume presents the major outcomes of the third edition of the Future of Higher Education – Bologna Process Researchers Conference (FOHE-BPRC 3) which was held on 27-29 November 2017. It acknowledges the importance of a continued dialogue between researchers and decision-makers and benefits from the experience already acquired, this way enabling the higher education community to bring its input into the 2018-2020 European Higher Education Area (EHEA) priorities. The Future of Higher Education – Bologna Process Researchers Conference (FOHE-BPRC) has already established itself as a landmark in the European higher education environment. The two previous editions (17-19 October 2011, 24-26 November 2014), with approximately 200 European and international participants each, covering more than 50 countries each, were organized prior to the Ministerial Conferences, thus encouraging a consistent dialogue between researchers and policy makers. The main conclusions of the FOHE Conferences were presented at the EHEA Ministerial Conferences (2012 and 2015), in order to make the voice of researchers better heard by European policy and decision makers. This volume is dedicated to continuing the collection of evidence and research-based policymaking and further narrowing the gap between policy and research within the EHEA and broader global contexts. It aims to identify the research areas that require more attention prior to the anniversary 2020 EHEA Ministerial Conference, with an emphasis

on the new issues on rise in the academic and educational community. This book gives a platform for discussion on key issues between researchers, various direct higher education actors, decision-makers, and the wider public. This book is published under an open access CC BY license.

*Competency Based Education And Training* Cambridge Scholars Publishing

Exploring the linkages between higher education and other levels of national education, the seminar examined in particular, the contribution of higher education to teacher training, non-formal education, and technical and vocational training, and touched The RoutledgeFalmer Reader in Sociology of Education

How2Become Ltd

Beyond the Enclave sets out to unravel the contradiction of a country, Zimbabwe, where a rich, diverse resource base co-exists with endemic poverty. One reason lies in the colonial economy, which was predicated on an ideology of white supremacy, creating an enclave formal economy employing one-fifth of the labour force. Yet over three decades after independence, the non-formal segment has become even more entrenched. This book assesses Zimbabwe's economy through three main phases: 1980- 0 when a strong social policy framework proved difficult to sustain due to erratic growth, and 1991- 6, when "structural adjustment" demanded a market-driven approach to development. The third phase is characterized by crisis-management leading to policy inconsistencies and reversals. Not surprisingly, such incoherence saw the economy descend into hyperinflation and paralysis in 2007- 8, leading to the signing of the Global Political Agreement in September 2008. In the absence

of formal dollarization, economic recovery after the adoption of the multi-currency regime has remained fragile, leaving an estimated 70 per cent of the population outside the banking system. This has further entrenched uneven (enclave) growth as the economy remains locked in a low-income poverty trap. There is a need to facilitate transition towards formality to promote decent jobs. Furthermore, a strategic, developmental role for the state in the economy is now widely recognized as vital for development. Beyond the Enclave argues for a new approach to development in Zimbabwe based on pro-poor and inclusive strategies, which will contribute to the well-being of all of its citizens and wise stewardship of its resources. It offers suggestions on policy formulation, implementation, monitoring and evaluation in all sectors, designed to promote inclusive growth and humane development.

**Handbook of Research on Entrepreneurship Development and Opportunities in Circular Economy** Springer Nature

Effective information and knowledge resource management is a driver of competitiveness. Many developing countries have put mechanisms in place that seek to match knowledge-based economies, where information has become the fuel for responsiveness, innovation, and competition. Concepts and Advances in Information Knowledge Management brings out emerging and current discussion from the sub-fields of information management in this environment. This title consists of sections on key aspects of information knowledge management and addresses knowledge management, library studies, archives and records management, and information systems. Presents research aimed at harmonizing theory and

practice of general information management paradigms Gives insight into the place of archives, records management, and information technology impacting socio-economic value chains Disseminates theoretical and applied models, and information management system architecture emerging from cloud computing and retrieval systems

Springer Science & Business Media

Master's Thesis from the year 2014 in the subject Tourism, grade: pass, Midlands State University (Midlands State University), course: Masters of Commerce in Tourism and Hospitality, language: English, abstract: This study was carried out to appraise the tourism and hospitality training in Botswana's institutions from a stakeholder's perspective. The stakeholders in this research were limited to the students and trainers/lecturers. The objectives of the study were: to determine stakeholders perceptions on the strengths of tourism and hospitality training among Botswana's tertiary institutions, to determine stakeholders perceptions on the weaknesses of tourism and hospitality training among Botswana's tertiary institutions, to determine the challenges faced by tourism and hospitality tertiary institutions with regard to delivering tourism training, to recommend strategies that may be adopted to improve the quality of tourism and hospitality training among Botswana's tertiary institutions. The purpose of the research was to examine the existing gap between the tourism and hospitality training and tourism manpower needs in Botswana. Current literature evaluation on the hospitality and tourism education and training shows a number of differences for the tourism and hospitality

manpower needs especially in developed countries. The study adopted a qualitative technique which involved both students and industry staff filling the questionnaires and also head of departments, trainers and managers were interviewed. Purposive and convenience sampling were used in order to select the participants. Semi-structured interview questions were used in the study as a method of data collection, and the study targeted seventy five students in all the institutions and two lecturers in each institution of four. One head of department in each institution, fifteen industry staff from all the four establishments, two managers from each establishment were interviewed. The study revealed that there is shortage of resources and current training curriculum is negatively impacting the effectiveness of the training institutions. The findings point out those learners is trained with limited resources and therefore some students produced by the institutions are not competent enough to face the labour market. The study recommended among other things to make the curricula more practical and equip trainers with the necessary skills that will give them more opportunity to carry out research. This will enable them to be effective and assist the academic institutions in Botswana in generating quality tourism and hospitality learners to work in the industry for future challenges.

[Africa Film & TV Magazine](#) Bloomsbury Publishing  
 Human Resource Management for the Hospitality and Tourism Industries takes an integrated look at HRM policies and practices in the tourism and hospitality industries. Utilising existing human resource management (HRM) theory and practice, it contextualises it to the tourism and hospitality industries by

looking at the specific employment practices of these industries, such as how to manage tour reps or working in the airline industry. It initially sets the scene with a broad review of the evidence of HRM practice within the tourism and hospitality industries. Having identified the broader picture, the text then begin to focus much more explicitly on a variety of HR policies and practices such as: • recruitment and selection: the effects of ICT, skills required specific for the industry and the nature of advertising • legislation and equal opportunities: illegal discrimination and managing diversity • staff health and welfare: violence in the workplace, working time directives, smoking and alcohol and drug misuse • remuneration strategies in the industry: the 'cafeteria award' approach, minimum wage and tipping Human Resource Management for the Hospitality and Tourism Industries is illustrated throughout with both examples of best practice for prescriptive teaching and discussion, and international case studies to exercise problem solving techniques and contextualise learning. It incorporates a user friendly layout and includes pedagogic features such as: chapter outlines and objectives, HRM in practice – boxed examples, reflective review questions, web links' discussion questions and further reading. Accompanying the text are online supplementary lecturer materials including downloadable figures from the book, PowerPoint slides, further cases and extra exercises and points for discussion.

*The Contribution of Higher Education to National Education Systems* Routledge

Study Abroad presents information on scholarships, university courses, training & continuing education programs, student

employment, & information on handicapped facilities. This edition contains 2,908 entries concerning post-secondary education in all fields in 120 countries & territories. Recommended in: ALA's Guide to Reference Books, Walford's Guide to Reference Material. Estudios en El Extranjero Springer

A selection of papers from the first symposium devoted to competency based learning held in March 1989. The book provides an historical backdrop for anyone coming new to the study of Competency-Based Education and Training (CBET).

Report of the Presidential Commission of Inquiry Into Education and Training Routledge

What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in

studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers, education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes.

“Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and re-positions the issue of education at the forefront of the debates on African development.” – Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada

“The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa.” – Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

**Outpost** Springer Nature

Covering the key points of dispute and areas of controversy within the field, this outstanding collection includes papers from the leading writers, and presents a sophisticated and versatile toolbox of ideas for theory-building and research.

Deryn Watson CapBIT 97, Capacity Building for Information Technologies in Education in Developing Countries, from which this publication derives, was an invited IFIP working conference sponsored by Working Groups in secondary (WG 3. 1), elementary (WG 3. 5), and vocational and professional (WG 3. 4)

education under the auspices of IFIP Technical Committee for Education (TC3). The conference was held in Harare, Zimbabwe 25th - 29th August 1997. CapBIT '97 was the first time that the IFIP Technical Committee for Education had held a conference in a developing country. When the Computer Society of Zimbabwe offered to host the event, we determined that the location and conference topic reflect the importance of issues facing countries at all stages of development- especially Information Technologies (IT) development. Information Technologies have become, within a short time, one of the basic building blocks of modern industrial society. Understanding IT, and mastering basic skills and concepts of IT, are now regarded as part of the core education of all people around the world, alongside reading and writing. IT now permeates the business environment and underpins the success of modern corporations as well as providing government with cost-effective civil service systems. At the same time, the tools and technologies of IT are of value in the process of learning, and in the organisation and management of learning institutions.

European Higher Education Area: The Impact of Past and Future Policies IGI Global

The voices that are represented in this collection come from various parts of the world and express the views of practitioners and scholars who have all had first-hand experience working in Zimbabwean theatre from the last days of Rhodesia to Zimbabwe. The collection views the long continuum of developments in local theatre history as a case of the intrusive hegemonies that came with colonial Rhodesia as a conquest society, and localised identities in the form of the persistence of indigenous and syncretic popular forms. With time, all these came together to constitute the makings of a contested post-colony in contemporary theatre practice in Zimbabwe. The primary interest of scholars who are represented here is located

at the intersection of political, cultural and performative discourses and the flow of Zimbabwean history. The focus, moreover, is not only on the history of performance cultures in postcolonial Zimbabwe - it extends its critical gaze to include the history of political ideas that gave rise to cultural contestation in the field of theatre and performance.

Human Resource Management for the Hospitality and Tourism Industries GRIN Verlag

This volume explores the challenges and solutions experienced within Zimbabwe's economic and social spheres, with particular reference to the "crisis years" (2000-2008) and the "promising turn" (2009-2012). This latter phase was prompted by the formation of the Government of National Unity (GNU). The contributors to the volume pay attention to how individuals and institutions sought to respond to the crisis, critiquing the reactions of various actors and exploring solutions to the various challenges that were experienced. Chapters in this book include reviews of agricultural subsidies, a gendered approach to poverty, the collapse of service delivery (including a particular focus on education), the "look East policy", the expansion of the religious sector, and the experiences of Zimbabwean migrants in South Africa. Underlying these contributions are the concepts of resilience and agency. The authors all highlight the massive challenges that individuals and institutions had to navigate, and acknowledge the creativity deployed in such quests. This book will appeal to scholars in economics, history and economic history, religious studies, education, and political science, as well as the general reader.

Director's Annual Report African Books Collective

With the need for sustainability, a focus on developing an economic system that aims at minimizing waste, commonly referred to as the circular economy, is emerging. Circular economy and studies related to it have gained worldwide attention, as it seems to be an effective alternative economic system. Naturally, the circular economy will impact enterprises and will shift how entrepreneurship development and entrepreneurial opportunities are perceived, developed, and resourced. The Handbook of Research on Entrepreneurship Development and Opportunities in Circular Economy is a collection of pioneering research that advances the understanding of entrepreneurship development, identifies the opportunities, and manages the entrepreneurship development, policies, and programs in order to further a circular economy. In addition to entrepreneurship development and entrepreneurial opportunities, the book will cover and discuss a number of other factors necessary for a successful transformation, such as entrepreneurship and innovation, entrepreneurship and change, and entrepreneurship education. While highlighting topics including consumer consumption, knowledge management, and linear economics, this book is ideally designed for entrepreneurs, small business owners, managers, consultants, organization development specialists, policymakers, researchers, industry experts, academicians, and students.

*Sociology of Education* Springer

This book analyses higher education from cultural perspectives and reflects on the uses of intellectual devices developed in the cultural studies of higher education over the last decades. It presents fresh perspectives to integrate cultural studies in higher

education with wider societal processes and studies the internal life of higher education. The book uses cultural perspectives developed in previous studies to understand a variety of processes and reforms taking place.

Beyond the Enclave Routledge

This book is a stepping stone toward solving public sector human capital challenges in Zimbabwe as it equips human capital managers with solutions to key issues in the public sector. In Zimbabwe, the public sector human capital drives the economy as over half of the population access their services through public enterprises. Government is the major agent in economic and infrastructure development as well as the production of goods and services. However, Zimbabwe's public service is underperforming due to poorly motivated and managed employees who do not respond to the needs of its clients. This is

a cause of concern as the public sector human capital is central to the overall performance of the public sector. Often public sector managers and leaders lack advanced, relevant, and dynamic skills and knowledge to deal with human resource challenges within the New Public Management environment. It is critical for the public sector to transform its human resource management to suit twenty-first-century needs. Effective human resource management in the public sector leads to economic growth and therefore the achievement of the Zimbabwe National Vision 2030. Therefore, this book serves as a guide for public sector managers and those directly or indirectly involved in human capital management. It provides in-depth knowledge and guidance in effective human capital management within the context of the public sector in Zimbabwe.
