Pius II (Æneas Silvius Piccolomini) the Humanist Pope Peter Lang
This collection of 18 articles about various aspects of the Crusades has

been compiled in honour of Hans Eberhard Mayer - a leading Crusade historian.

Notebook Wipf and Stock Publishers
Incorporating advanced, up-to-date basic science with current clinical knowledge to set a new standard in the field This major new reference offers the most

complete and balanced coverage of modern rhinology and skull base surgery available today by integrating key advances in the basic sciences with modern clinical developments. From the role of genetics, allergy, and immunology in rhinologic disorders to new, evidence-based medical and surgical approaches, the book covers all aspects of this dynamic, multidisciplinary specialty. With nearly 80 videos online—including full patient cases with imaging, endoscopic examinations, and step-by-step surgical techniques—complements the book. Special Features: Highlights basic science developments in anatomy, embryology, pathophysiology, immunology, genetics, and investigative rhinology Includes more than 900 full-color photographs

and 120 drawings Structured on evidence-based medicine principles and based on current, evidence-based guidelines (including the EPOS 2012 and Endoscopic Skull Base Tumors consensus document) Shares the medical and surgical expertise of a truly international team of more than 100 clinicians and scientists from 17 countries A learning-focused textbook, with structured chapters, each one including tips and tricks, important notes, key points, summary, and self-assessment questions The only textbook tailored to the curriculum of the British Intercollegiate, FRCS(ORL-HNS), American Board of Otolaryngology, and European Academy exams A world-class clinical reference as well as a comprehensive textbook, Rhinology and

Skull Base Surgery: From the Lab to the Operating Room is unrivalled for its breadth of coverage—from basic science breakthroughs to the newest diagnostic tools to the most advanced endoscopic treatment techniques. A book that all practicing rhinologists, otolaryngologists, skull base surgeons as well as residents and fellows in otolaryngology will find indispensable for expanding their surgical and medical expertise—and also for gaining a full understanding of the basic science framework of their multifaceted specialty.

Duce Loba Publishing

Troeltsch seeks to determine how much the "Modern Spirit" of the early twentieth century actually owed to Protestantism. Troeltsch then proceeds to a comparison

between the essential spirit of Protestantism and the Modern Spirit. The book focuses on the practical: ethical, political, and economic.

What Works Princeton University Press
The "City of God" or the "City of Man"?

This is the choice St. Augustine offered 1500 years ago—and according to Pierre Manent the modern West has decisively and irreversibly chosen the latter. In this subtle and wide-ranging book on the Western intellectual and political condition, Manent argues that the West has rejected the laws of God and of nature in a quest for human autonomy. But in declaring ourselves free and autonomous, he contends, we have, paradoxically, lost a sense of what it means to be human. In the first part of the book, Manent explores the

development of the social sciences since the seventeenth century, portraying their growth as a sign of increasing human "self-consciousness." But as social scientists have sought to free us from the intellectual confines of the ancient world, he writes, they have embraced modes of analysis--economic, sociological, and historical--that treat only narrow aspects of the human condition and portray individuals as helpless victims of impersonal forces. As a result, we have lost all sense of human agency and of the unified human subject at the center of intellectual study. Politics and culture have come to be seen as mere foam on the tides of historical and social necessity. In the second half of the book, titled "Self-Affirmation," Manent examines how the

West, having discovered freedom, then discovered arbitrary will and its dangers. With no shared touchstones or conceptions of virtue, for example, we have found it increasingly hard to communicate with each other. This is a striking contrast to the past, he writes, when even traditions as different as the Classical and the Christian held many of these conceptions in common. The result of these discoveries, according to Manent, is the disturbing rootlessness that characterizes our time. By gaining autonomy from external authority, we have lost a sense of what we are. In "giving birth" to ourselves, we have abandoned that which alone can nurture and sustain us. With penetrating insight and remarkable erudition, Manent offers a profound analysis of the confusions

and contradictions at the heart of the modern condition.

A Linguistic Atlas of Late Medieval English PIMS

"Science fiction, because of its links to science and technology, is the consummate literary vehicle for examining the perception and cultural impact of the modernization process in Brazil. Because of the centrality of the role played by the military dictatorship (1964-85) in imposing industrialization and economic development policies on Brazil, this book examines the genre in the periods before, during, and after the dictatorship, encompassing the years 1960-2000. The analysis shows that a reading of Brazilian science fiction based on its use of paradigms of Anglo-American science fiction and myths of

Brazilian nationhood provides a unique look into Brazil's modern metamorphosis as it finds itself on the periphery of the globalized world." "The three periods studied here correspond roughly to the 1960s, the '70s, and the '80s to the present. The earliest group of authors produces mostly antitechnological, apolitical science fiction, as a way of affirming myths of Brazilian identity. Here, the deconstruction of myths of the feminine and of racial democracy provides the basis for the analysis of Brazil's notion of national identity. In the seventies, a second group of authors uses science fiction to protest the military regime, creating dystopian worlds in which the myths of Brazilian culture serve as touchstones to criticize various ills associated with urbanization,

industrialization, and repression. In the analysis of these texts, the insights of ecofeminism are employed to demystify the conflation of the land with women found in the nostalgic construction of Brazilian identity characteristic of this period. The third group, emerging in the mideighties after the dictatorship, offers a more complex, postmodern view of Brazilian society, its continuing social problems, and the phenomenon of globalization. Reading these texts as allegories of modernization enriches the understanding of both the genre of science fiction and the experience of modernity itself."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Solutions ... not theories. Political progress ... not political posturing. Instead of the constant jockeying for political advantage, in *What Works*, author and columnist Cal Thomas focuses on what promotes the general welfare, regardless of which party or ideology gets the credit. Thomas probes and provides answers to questions like, Why must we constantly fight the same battles over and over? Why don't we consult the past and use common sense in order to see that what others discovered long ago still works today? And why does present-day Washington too often look like the film *Groundhog Day*, with our elected officials waking up each day only to repeat identical talking points from previous days, months, and years? Without letting politics, or

ignorance, get in the way, Thomas urges readers to pay attention so that politicians can no longer pick their pockets—literally or intellectually. What Works is about solutions, not theories. It's about pressuring political leadership to forget about the next election and start focusing on the needs of the people who work hard to provide for themselves, send their tax dollars to Washington, and want to see the country achieve something of value ... like it has always done.

The Other Side: Or, Notes for the History of the War Between Mexico and the United States. Written in Mexico. Tr. from the Spanish, and Ed., with Notes
Harvard University Press

Reproduces 21 articles published during the 1990s that demonstrate how a

gender perspective has been incorporated into existing themes and methods of migration research and has led to the development of new areas of interest. Considering gender and migration in North America, Europe, Latin America, Africa, and Asia, they examine such issues as employment, gender relations, household organization, identity, citizenship, transnationalism, migration policy, migration as gendered work, the social construction of female migrants, accompanying spouses, and women left behind. There is no subject index.

Aeneas Sylvius Piccolomini (1405-1464, elected Pope Pius II in 1458) was an important and enigmatic figure of the Renaissance as well as one of the most prolific writers and gifted stylists ever to occupy the papacy

Catalog E. CRC Press

Marine fishes have been intensively studied, and some of the fundamental ideas in the science of marine ecology have emerged from the body of knowledge derived from this diverse group of organisms. This unique, authoritative, and accessible reference, compiled by 35 luminary ecologists, evolutionary biologists, and

ichthyologists, provides a synthesis and interpretation of the large, often daunting, body of information on the ecology of marine fishes. The focus is on the fauna of the eastern Pacific, especially the fishes of the California coast, a group among the most diverse and best studied of all marine ecosystems. A generously illustrated and comprehensive source of information, this volume will also be an important launching pad for future research and will shed new light on the study of marine fish ecology worldwide. The contributors touch on many fields in biology, including physiology, development, genetics, behavior, ecology, and evolution. The book includes sections on the history of research, both published and

unpublished data, sections on collecting techniques, and references to important earlier studies.

Montjoie Columbia University Press
Mount Sinai Expert Guides: Allergy and Clinical Immunology will provide trainees in allergy and immunology with an extremely clinical and accessible handbook covering the major disorders and symptoms, their diagnosis and clinical management. Perfect as a point-of-care resource on the hospital wards and also as a refresher for board exam preparation, the focus throughout is on providing rapid reference, essential information on each disorder to allow for quick, easy browsing and assimilation of the must-know information. All chapters follow a consistent template including the following features: An opening

bottom-line/key points section
 Classification, pathogenesis and prevention of disorder Evidence-based diagnosis, including relevant algorithms, laboratory and imaging tests, and potential pitfalls when diagnosing a patient Disease management including commonly used medications with dosages, management algorithms and how to prevent complications How to manage special populations, ie, in pregnancy, children and the elderly The very latest evidence-based results, major society guidelines and key external sources to consult In addition, the book comes with a companion website housing extra features such as case studies with related questions for self-assessment, key patient advice and ICD codes. Each guide also has its own

mobile app available for purchase, allowing you rapid access to the key features wherever you may be. If you're specialising in allergy and immunology and require concise, practical and clinical guidance from one of the world's leading institutions in this field, then this is the perfect book for you. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

Territorio de la Baja California Variorum Publishing

In *Women, Men, and Spiritual Power*, John Coakley explores male-authored narratives of the lives of Catherine of Siena, Hildegard of Bingen, Angela of Foligno, and six other female prophets or mystics of the late Middle Ages. His

readings reveal the complex personal and literary relationships between these women and the clerics who wrote about them. Coakley's work also undermines simplistic characterizations of male control over women, offering an important contribution to medieval religious history. Coakley shows that these male-female relationships were marked by a fundamental tension between power and fascination: the priests and monks were supposed to hold authority over the women entrusted to their care, but they often switched roles, as the men became captivated with the women's spiritual gifts. In narratives of such women, the male authors reflect directly on the relationship between the women's powers and their own. Coakley argues

that they viewed these relationships as gendered partnerships that brought together female mystical power and male ecclesiastical authority without placing one above the other. *Women, Men, and Spiritual Power* chronicles a wide-ranging experiment in the balance of formal and informal powers, in which it was assumed to be thoroughly imaginable for both sorts of authority, in their distinctly gendered terms, to coexist and build on each other. The men's writings reflect an extended moment in western Christianity when clerics had enough confidence in their authority to actually question its limits. After about 1400, however, clerics underwent a crisis of confidence, and such a questioning of institutional power was no longer considered safe. Instead

of seeing women as partners, their revelatory powers began to be viewed as evidence of witchcraft.

Chronic Rhinosinusitis Thieme

A provocative rethinking of France's long relationship with the Arab world To fully understand both the social and political pressures wracking contemporary France—and, indeed, all of Europe—as well as major events from the Arab Spring in the Middle East to the tensions in Mali, Andrew Hussey believes that we have to look beyond the confines of domestic horizons. As much as unemployment, economic stagnation, and social deprivation exacerbate the

ongoing turmoil in the banlieues, the root of the problem lies elsewhere: in the continuing fallout from Europe's colonial era. Combining a fascinating and compulsively readable mix of history, literature, and politics with his years of personal experience visiting the banlieues and countries across the Arab world, especially Algeria, Hussey attempts to make sense of the present situation. In the course of teasing out the myriad interconnections between past and present in Algeria, Morocco, Tunisia, Beirut, and Western Europe, *The French Intifada* shows that the defining conflict of the twenty-first century will not be between Islam and the West but between two dramatically different experiences of the world—the colonizers and the colonized.

The Ecology of Marine Fishes Zondervan
Allergy and Allergen Immunotherapy:
New Mechanisms and Strategies is a
valuable and comprehensive book that
covers allergy and causative allergens
and provides diagnostic and therapeutic
aspects as well. With chapters from
internationally recognized experts in the
field, the book provides a balanced
approach to enumerating pollen
allergens as well as allergy diagnosis
and therapeutic management and safety
assessment of genetically engineered
food allergens. The book features a
special section on allergic diseases and
allergens from tropical countries,
including such countries such as India,
Sri Lanka, Iran, and South Korea, giving
the book a global appeal. The book is
broken in the following sections:

Epidemiology, Pathophysiology, and
Diagnosis of Allergy Aerobiology and
Allergic Diseases Pollen Allergy in the
Tropics and Temperate Regions Allergy
in Children Food Allergy Evaluation
Allergen Immunotherapy and Anti IgE
The book deals not only on basics of
allergy and allergen immunotherapy but
also discusses indoor environments and
safety considerations of genetically
modified food allergens. The first of its
kind volume from the Indian
subcontinent that caters to the needs of
clinicians, aerobiologists,
environmentalists, and regulatory
agencies as well, the volume will be of
immense interest for clinicians and
patients of allergy as well as diagnostic
and therapeutic management of allergy
in tropics.

The Art of Urbanism explores how the royal courts of powerful Mesoamerican centers represented their kingdoms in architectural, iconographic, and cosmological terms. Through an investigation of the ecological contexts and environmental opportunities of urban centers, the contributors consider how ancient Mesoamerican cities defined themselves and reflected upon their physical and metaphysical place via their built environment. Themes in the volume include the ways in which a kingdom's public monuments were

fashioned to reflect geographic space, patron gods, and mythology, and how the Olmec, Maya, Mexica, Zapotecs, and others sought to center their world through architectural monuments and public art. This collection of papers addresses how communities leveraged their environment and built upon their cultural and historical roots as well as the ways that the performance of calendrical rituals and other public events tied individuals and communities to both urban centers and hinterlands. Twenty-three scholars from archaeology, anthropology, art history, and religious studies contribute new data and new perspectives to the understanding of ancient Mesoamericans' own view of their spectacular urban and ritual centers.

Gesta Salvatoris Immunology and Allergy Clinics

Thousands of families and individuals are attracted to the South Carolina coast each year, renting houses up and down the beach throughout the seasons. They bring their lives with them when they come to this magical place. In *A Week at Surfside Beach*, author Pierce Koslosky Jr. has crafted sixteen poignant short stories that paint a vivid portrait of the beach's diverse, temporary inhabitants: those people attracted to a landscape both beautiful and overwhelming in its ability to force introspection and change. Set over the course of a single rental season that ends at Christmas, the book's unrelated characters all have their stays in the blue beach house, yet

each story has a distinct message at its core. Readers will follow people in every stage of life--from a six-year-old entering the imaginary world of crabs to an escapee from a retirement home--and witness their varied individual experiences. These are stories of hope and redemption, connection and detachment, and lessons taught and learned. Both original and contemplative, heartbreaking and inspirational, *A Week at Surfside Beach* brings together a collection of tales with seemingly ordinary, simple, and familiar details--yet underneath their calm, relatable surfaces exist the uncomfortable, extraordinary complexities of life.
