Over the last few years,  
financial statement  
scandals, cases of fraud  
and corruption, data  
protection violations, and  
other legal violations have  
led to numerous liability  
cases, damages claims,  
and losses of reputation.

As a reaction to these  
developments, several  
regulations have been  
issued: Corporate  
Governance, the  
Sarbanes-Oxley Act, IFRS,  
Basel II and III, Solvency II  
and BilMoG, to name just  
a few. In this book,  
compliance is understood  
as the process, mapped  
not only in an internal  
control system, that is  
intended to guarantee  
conformity with legal  
requirements but also  
with internal policies and  
enterprise objectives (in  
particular, efficiency and  
profitability). The current

literature primarily  
confines itself to mapping  
controls in SAP ERP and  
auditing SAP systems.  
Maxim Chuprunov not  
only addresses this  
subject but extends the  
aim of internal controls  
from legal compliance to  
include efficiency and  
profitability and then well  
beyond, because a basic  
understanding of the  
processes involved in IT-  
supported compliance  
management processes  
are not delivered along  
with the software. Starting  
with the requirements for  
compliance (Part I), he not

only answers compliance-relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC (Part III). He thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts,

auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular.

SAPUI5 has quickly become the open-source programming language with the best options for responsive and versatile SAP app development. So how well do you speak SAPUI5, and what can you do with it? Learn to develop next-generation UIs for mobile-ready, data source-agnostic, client-

side SAP applications.

First review basic HTML5 and CSS3, JavaScript, and jQuery concepts as a foundation for working with SAPUI5, and then explore the development and runtime environments, tools, and controls that you'll use throughout the design process. Use step-by-step instructions, sample code listings, and a full-scale model application to develop and customize your own apps with advanced functionality from the SAP system. The future of app

development has arrived--make sure you can speak its language. 1. Basic Concepts Learn the standards of SAPUI5--HTML5, CSS3, JavaScript, and the jQuery library--so you don't have to reinvent the wheel every time 2. SAPUI5 Runtime Environment Use bootstrapping, data binding, and theming elements to ensure that your applications run smoothly on operating systems and that the software modules can be reused. 3. SAPUI5 in SAP HANA Develop your own

application on the XS Engine in SAP HANA. Then construct a calculation view and use it as an OData service. 4. UI Components and Controls Implement the SAPUI5 controls and elements you've learned in a detailed employee portal example. 5. Mobile Development Explore the mobile capabilities of SAPUI5 and SAP Fiori by developing your own cross-platform Hybrid Web Container applications for multiple devices. Highlights: HTML5 and CSS3

Por la necesidad de desarrollar y modificar los programas que existen en

las empresas, el puesto de programador en ABAP/4 es muy demandado en las principales compañías españolas y extranjeras. Saber programar en ABAP/4 es entender y poder modificar “las entrañas” de SAP R/3. La ausencia de bibliografía adecuada ni en castellano ni en inglés hacen de este libro una herramienta útil para cualquier programador.
