La fine dei tempi è una minaccia molto più reale di quanto si possa immaginare. L'unica speranza è affidata a un gruppo di monaci guerrieri che vive in segreto tra gli umani sin dai tempi dei Maya: i Custodi della Notte. Leah Daniels, detective della narcotici di Miami, pensava di essere abituata agli imprevisti. Ma certo non si aspettava di essere incatenata a un altare di pietra, in un antico rituale sanguinario, né tantomeno di essere salvata da un uomo affascinante che dice di averla conosciuta nelle sue visioni. Lui è il principe dei Custodi della Notte e dovrà scegliere tra scongiurare l'apocalisse o proteggere il suo amore, in una lotta contro il tempo e contro la fine dei tempi.

This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.

This timely and original volume fills the gaps in the existing theoretical and philosophical literature on international relations by problematizing civilization as a new unit of research in global politics. It interrogates to what extent and in what ways civilization is becoming a strategic frame of reference in the current world order. The book complements and advances the existing field of study previously dominated by other approaches – economic, national, class-based, racial, and colonial – and tests its key philosophical suppositions against countries that exhibit civilizational ambitions. The authors are all leading international scholars in the fields of political theory, IR, cultural analysis, and area studies who deal with various aspects of the civilizational arena. Offering key chapters on ideology, multipolarity, modernity, liberal democracy, and capitalism, this book extends the existing methodological, theoretical, and empirical debates for IR and area studies scholars globally. It will be of great interest to politicians, public opinion makers, and all those concerned with the evolution of world affairs.

Something everyone has the power to do is reduce your cancer risk, and this book will show you just how easy it is to do it. Each year, over a million people in the United States alone hear the words no one ever wants to hear: You have cancer. But what if there was a way for fewer people to hear these words? One of the biggest myths regarding cancer is that it's mostly genetic - meaning that you have no control over whether you get it. While genetics do have an impact, the truth is that your lifestyle and environment play the major role. Physician and Chief Medical Officer of WebMD John Whyte, MD, MPH, shares straightforward information and equips you with strategies to help you on a journey to better health. In *Take Control of Your Cancer Risk*, Dr. Whyte provides helpful tips including: assessing your cancer risk knowing which screenings you need, and when learning the role food, exercise, and sleep play understanding the relationship between stress and cancer. *Take Control of Your Cancer Risk* is filled with practical advice that empowers you to really take control of our health.

If anybody had told Prissy, a conservative Southern housewife, she would one day be driving around town with a stoned, drunk black man named Willie in her backseat while she begged--no, ordered--him into her house for the night, she would have told them they were nuts. But it happened. An emotionally honest account, *Far Outside the Ordinary* chronicles the period in Prissy's life when, during a routine physical, her fifty-year-old husband is given less than a year to live. Southern black caregivers move into her home and work around the clock to aid her family. Soon, Prissy finds herself a spectator in her own home, observing events far outside the boundaries of her once ordinary life. *Far Outside the Ordinary* is also a story of happily ever after, a romantic fairy tale. When her high school boyfriend reappears in her life, Prissy learns love has no expiration date. Sometimes a second chance at love can come disguised, and when least expected.

Translated from original Marathi by Indira Kher, this work is a verse composition containing the known facts about Shri Sai Baba's life at Shirdi, and also his teachings seeks to meet a long-felt need. This is the Bible of Sai devotees in every sense of the term, in its veracity, sanctity, faith and devotion that it inspires and the deep satisfaction, a sense of fulfilment that it brings to the devotee, it has no equal. Its sanctity derives from the fact that its idea was conceived during Baba's lifetime and with his blessings and express permission. For those unaware of Shri Sai Satcharita it is necessary to add that in the original it runs into 53 chapters and contains over 9,000 verses. Every chapter has a judicious mixture of philosophy, stories and anecdotes along with the Baba's teachings.
