DIY House Shows and Music Venues in the US is an interdisciplinary study of house concerts and other types of DIY ("do-it-yourself") music venues and events in the United States, such as warehouses, all-ages clubs, and guerrilla shows, with its primary focus on West Coast American DIY locales. It approaches the subject not only through a cultural analysis of sound and discourse, as it is common in popular music studies, but primarily through an ethnographic examination of place, space, and community.

Focusing on DIY houses, music venues, social spaces, and local and translocal cultural geographies, the author examines how American DIY communities constitute themselves in relation to their social and spatial environment. The ethnographic approach shows the inner workings of American DIY culture, and how the particular people within particular places strive to achieve a social ideal of an "intimate" community. This research contributes to the sparse range of Western popular music studies (especially regarding rock, punk, and experimental music) that approach their subject matter through a participatory ethnographic research.

The purpose of this book is to convey to the worldwide scientific community the rapid and enthusiastic progress of state-of-the-art quantum chemistry. Quantum chemistry continues to grow with remarkable success particularly due to rapid progress in supercomputers. The usefulness of quantum chemistry is almost limitless. Its application covers not only physical chemistry but also organic and inorganic chemistry, physics, and life sciences. This book deals with all of these topics. Frontiers of Quantum Chemistry is closely related to the symposium of the same name held at Kwansai Gakuin University at Nishinomiya, Japan, in November 2015. The book's contributors, however, include not only invited speakers at the symposium but also many other distinguished scientists from wide areas

of quantum chemistry around the world.

Neste livro abordam-se a educação, a internet e as relações possíveis entre ambas. Nós vivemos numa época em que não basta ser plenamente escolarizado em todos os níveis da educação formal. Hoje, se não fizermos parte do mundo virtual, seremos pessoas consideradas excluídas digitais. Quanto mais afastados estivermos desse novo jeito de viver, de comunicar, de conhecer, maiores serão nossas desvantagens. Temos que saber como funciona essa realidade, quais as vantagens, limitações e possibilidades que temos no uso das ferramentas digitais.

What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? "The Long Tail" is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its

power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

In *Heartland Excursions*, a legendary ethnomusicologist takes the reader along for a delightful, wide-ranging tour of his workplace. Bruno Nettl provides an insightful, sometimes tongue-in-cheek, always pithy ethnography of midwestern university schools of music from a different perspective in each of four chapters, alternating among three distinct voices: the longtime professor, the "native informant," and the outside observer, an "ethnomusicologist from

Mars." If you've ever been to a concert or been connected to a university with a school of music, you'll discover yourself--or someone you know--in these pages. "In the music building you can't tell the quick from the dead without a program."--Chapter 1, "In the Service of the Masters" "The great ability of a violin student whom I observed was established when his dean was persuaded to accompany him."--Chapter 2, "Society of Musicians" "Some teachers of music history would accuse students who listen to Elvis Presley not only of taking time away from hearing Brahms, but also of polluting themselves."--Chapter 3, "A Place for All Musics?" At commencement, the graduates "were perhaps not aware that they had just participated in an event in which the principal values of the Western musical world . . . had been taken out of storage bins for annual exercise."--Chapter 4, "Forays into the Repertory"

The idea that the speed of light is a constant - at

186,000 miles per second - is one of the few scientific facts that almost everyone knows. That constant - c - also appears in the most famous of all scientific equations: $e=mc^2$. Yet over the last few years, a small group of highly reputable young physicists have suggested that the central dogma of modern physics may not be an absolute truth - light may have moved faster in the earlier life of the universe, it may still be moving at different speeds elsewhere today. In telling the story of this heresy, and its gradual journey towards acceptance, Joao Magueijo writes as one of the three central figures in the story, introducing the reader to modern cosmology, to the implications of VSL (variable speed of light) and to the world of physicists. The initial rejection of Magueijo's ideas is beginning to give way to a reluctant acceptance that the young men may have a point - only the next few years will tell the final fate of this 'dangerous' idea.

Excerpt from Commercial Directory of Latin America
In compliance with the requests of many merchants and manufacturers who desire to send Catalogues and Circulars to importers and dealers in Mexico, Central and South America, the Bureau of the American Republics has undertaken to publish a series of Commercial Directories of the several countries and colonies. The difficulty of securing the names and addresses of merchants has been greater than was anticipated, particularly those in cities and towns where there are no consular officers of the United States, and the lists herein given will be found incomplete. They are, however, as complete and accurate as the Bureau can make them with the present facilities at its command, and will doubtless be found useful to those who desire to

introduce their wares to the knowledge of buyers on the southern continent. Any additions and corrections for subsequent publications will be appreciated. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at
