By optimizing your blocks, you will find that AutoCAD is not just about drawing lines or just get the drawings done. You can draw lines fast, but productivity is beyond that. It's not just to get the drawings

done. You need to be able to modify drawings easily during the design process. You may be able to finish your drawing very quickly, but you may spend too much time when you're doing revisions. If you do, then you're not being productive. Drawings also should provide necessary information. Furthermore, you will want to add some intelligence, so you can automate some process.
