Privatization is under attack. Beginning in the 1980s, thousands of failing state-owned enterprises worldwide have been turned over to the private sector. But public opinion has turned against privatization. A large political backlash has been brewing for some time, infused by accusations of corruption, abuse of market power, and neglect of the poor. What is the real record of privatization and are the criticisms justified? 'Privatization in Latin

America' evaluates the empirical evidence on privatization in a region that has witnessed an extensive decline in the state's share of production over the past 20 years. The book is a compilation of recent studies that provide a comprehensive analysis of the record of and accusations against privatization, with important recommendations for the future. Seven countries are investigated: Argentina, Bolivia, Brazil, Chile, Colombia, Mexico, and Peru. This book will be vital to anyone interested in the privatization debate but especially to those involved in civil service reform, corporate governance, economic policy, finance, and anticorruption efforts. 'Privatization is important but controversial. While

economists typically favor it, others are skeptical. This book provides strong scientific evidence that privatization has been beneficial for many Latin American countries, although some privatizations failed and some groups in society lost out. As usual, the devil is in the details: how privatization is carried out and what reforms accompany it are crucial to its success. The book is definitely an invaluable contribution to the privatization debate.' --Oliver Hart, Andrew E. Furer Professor of Economics, Harvard University *The derivative spelling book, by C. and G. Eves* U of Minnesota Press  
This book investigates the role of the Latin language as a vehicle for science and learning from several angles. First, the

question what was understood as 'science' through time and how it is named in different languages, especially the Classical ones, is approached. Criteria for what did pass as scientific are found that point to 'science' as a kind of Greek *Denkstil* based on pattern-finding and their unbiased checking. In a second part, a brief diachronic panorama introduces schools of thought and authors who wrote in Latin from antiquity to the present. Latin's heydays in this function are clearly the time between the twelfth and eighteenth centuries. Some niches where it was used longer are examined and reasons sought why Latin finally lost this lead-role. A third part seeks to define the peculiar characteristics of scientific Latin using corpus linguistic approaches. As a result, several types of scientific writing can be identified. The question of how to transfer science from one linguistic medium to another is never far: Latin inherited this role from Greek and is in turn the ancestor of science done in the modern vernaculars. At the end of the study, the importance of Latin science for modern science in English becomes evident.

An icon of the Cold War, Boeing's mighty B-52 is undoubtedly one of the most famous jet bombers ever built, having served now for almost 40 years. This book details the full B-52 story, with squadron histories and full technical specifications. *Typographical Journal* Osprey Publishing  
A much-needed addition to the emerging literature on the formative power of religious practices, "Educating People of Faith" creates a vivid portrait of the lived practices that shaped the faith of Jews and Christians in synagogues and churches from antiquity up to the seventeenth century. This significant book is the work of Jewish, Roman Catholic, Orthodox, and Protestant scholars who wished to discover and describe how Jews and Christians through history have been formed in religious ways of thinking and acting. Rather than focusing solely on either intellectual or social life, the authors all use the concept of practices as they attend to the embodied, contextual character of religious formation. Their studies of religious figures, community life, and traditional practices such as

preaching, sacraments, and catechesis are colorful, detailed, and revealing. The authors are also careful to cover the nature of religious education across all social levels, from the textual formation of highly literate rabbis and monks engaged in Scripture study to the local formation of illiterate medieval Christians for whom the veneration of saints' shrines, street performances of religious dramas, and public preaching by wandering preachers were profoundly formative. "Educating People of Faith" will benefit scholars and teachers desiring a fuller perspective on how lived practices have historically formed people in religious faith. It will also be useful to practical theologians and pastors who wish to make the resources of the past available to practitioners in the present. Contributors: John C. Cavadini Anne L. Clark Lawrence S. Cunningham Joseph Goering Robert Goldenberg Stanley Samuel Harakas Robert M. Kingdon Blake Leyerle Michael A. Signer Philip M. Soergel David C. Steinmetz John Van Engen Lee Palmer Wandel Robert Louis Wilken Elliot R. Wolfson
