Is medical ethics in times of armed conflict identical to medical ethics in times of peace, as the World Medical Association declares? In *Bioethics and Armed Conflict*, the first comprehensive study of medical ethics in conventional, unconventional, and low-intensity war, Michael Gross examines the dilemmas that arise when bioethical principles clash with military necessity—when physicians try to save lives during an endeavor dedicated to taking them—and describes both the conflicts and congruencies of military and medical ethics. Gross describes how the principles of contemporary just war, unlike those of medical ethics, often go beyond the welfare of the individual to consider the collective interests of combatants and noncombatants and the general interests of the state. Military necessity plays havoc with such patients' rights as the right to life, the right to medical care, informed consent, confidentiality, and the right to die. The principles of triage in battle conditions dictate not need-based treatment but the distribution of resources that will return the greatest number of soldiers to active duty. And unconventional warfare, including current "wars" on terrorism, challenges the traditional concept of medical neutrality as physicians who have sworn to "do no harm" are called upon to lend their expertise to "interrogational" torture or to the development of biological or chemical weapons. Difficult dilemmas inevitably arise during armed conflict, and medicine, Gross concludes, is not above the fray. Medical ethics in time of war cannot be identical to medical ethics in peacetime.

Garry Kasparov on Garry Kasparov, Part 1 is the first book in a major new three-volume series. This series will be unique by the fact that it will record the greatest chess battles played by the greatest chessplayer of all-time. The series in itself is a continuation of Kasparov's mammoth history of chess, comprising *My Great Predecessors* and *Modern Chess*. Kasparov's historical volumes have received great critical and public acclaim for their rigorous analysis and comprehensive detail regarding the developments in chess that occurred both on and off the board.. This new volume and series continues in this vein with Kasparov scrutinising his most fascinating encounters from the period 1973-1985 whilst also charting his development away from the board. This period opens with the emergence of a major new chess star from Baku and ends with Kasparov's first clash with reigning world champion Anatoly Karpov - a mammoth encounter that stretched out over six months. It had been known in Russia for some time that Kasparov had an extraordinary talent but the first time that this talent was unleashed on the western world was in 1979. The Russian Chess Federation had received an invitation for a player to participate in a tournament at Banja Luka and, under the impression that this was a junior event, sent along the fifteen year old Kasparov (as yet without even an international rating!). Far from being a junior tournament, Banja Luka was actually a major international event featuring numerous world class grandmasters. Undeterred Kasparov stormed to first place, scoring 111/2/15 and finishing two points clear of the field. Over the next decade this 'broad daylight' between Kasparov and the rest of the field was to become a familiar sight in the world's leading tournaments.

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun* and *Infamy*. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

Every chess player knows that some moves are harder to see than others. Why is it that, frequently, uncomplicated wins simply do not enter your mind? Even strong grandmasters suffer from blind spots that obscure some of the best ideas during a game. What is more: often both players fail to see the opportunity that is right in front of their eyes. Neiman and Afek have researched this problem and discovered that there are actually reasons why your brain discards certain ideas. In this book they demonstrate different categories of hard-to-see chess moves and clearly explain the psychological, positional and geometric factors which cloud your brain. *Invisible Chess Moves* with its many unique examples, instructive explanations and illuminative tests, will teach how to discover your blind spots and see the moves which remain invisible for others. Your results at the board will improve dramatically because your brain will stop blocking winning ideas.

In this time of quarantine and global uncertainty, it can be difficult to deal with the increased stress

and anxiety. Using ancient self-care techniques rediscovered by Herbert Benson, M.D., a pioneer in mind/body medicine for health and wellness, you can relieve your stress, anxiety, and depression at home with just ten minutes a day. Herbert Benson, M.D., first wrote about a simple, effective mind/body approach to lowering blood pressure in *The Relaxation Response*. When Dr. Benson introduced this approach to relieving stress over forty years ago, his book became an instant national bestseller, which has sold over six million copies. Since that time, millions of people have learned the secret—without high-priced lectures or prescription medicines. *The Relaxation Response* has become the classic reference recommended by most health care professionals and authorities to treat the harmful effects of stress, anxiety, depression, and high blood pressure. Rediscovered by Dr. Benson and his colleagues in the laboratories of Harvard Medical School and its teaching hospitals, this revitalizing, therapeutic tack is now routinely recommended to treat patients suffering from stress and anxiety, including heart conditions, high blood pressure, chronic pain, insomnia, and many other physical and psychological ailments. It requires only minutes to learn, and just ten

minutes of practice a day.

Former US Open Champion Timothy Taylor takes a contemporary look at one of Black's most ambitious counters to 1 e4, the Alekhine Defence. This is a sharp, creative opening in which Black attacks from the very beginning, luring White's central pawns forward in the expectation of destroying them later on. In this book Taylor constructs a practical repertoire for Black, ideal for the modern-day player. All the key tactical and positional ideas are covered and important move-order nuances are highlighted. This book provides everything you need to know in order to play the Alekhine with confidence.
