'One of the most thrilling moments occurred ten years ago when I found a single wild flower growing on a grassy bank. It was not particularly rare - a common spotted orchid - but it was like discovering a pot of gold - or perhaps, more accurately, the promise of gold. It was a sign that recovery was possible from even the most inauspicious situation.' Spend a year in the garden with Monty Don - the UK's favourite gardener, writer and broadcaster - accompanied by his beloved dogs, Nigel and Nellie. A breath of fresh country air. Each season has something different to delight in - from the primroses and bluebells of spring, to butterflies that colour summer skies and the crowds of migrating swallows that herald the coming of autumn - all have a place alongside the yearly cycle of growth and renewal. My Garden World is an ode to the ever-surprising and comforting presence of nature. In exquisitely written prose, reflecting the best of nature writing, this book offers an opportunity to walk alongside Monty, month by month, and experience the commonplace miracles and rhythms of nature through his eyes.

It may take a few more decades, but 'soon enough,' A.I. will turn into super-A.I. This is an artificial intelligence which in all areas of what is now seen as 'human intelligence' approaches this, then surpasses it. After that, it will keep growing exponentially. In the meantime, at relatively short notice, humanity will encounter a challenging A.I. bi-bottleneck: 1) humans possibly misusing A.I. in a big way, and 2) A.I. spiraling into many directions of which any unfortunate one may be enough for disaster. Will we control A.I. or will A.I. dominate us? Let's hope this is the wrong question. Because if it's the right question, and given enough time, there is no shred of a doubt about the answer. Still, of course, we need to give it our best shot not to be dominated by an evil force. We should strive for control. At the same time, transcending the question opens up the domain of Compassion. This gradually makes thinking in terms of 'control' and 'domination' in human - A.I. interactions obsolete. We will together strive for a better world within an alignment of our values. But what are the real human values? There are cultural and individual differences. Moreover, what seem to be anyone's values may be a superficial layer above deeper values, which are not necessarily congruent with conscious awareness. So, the human/A.I. value alignment question will be: how to align what? I write in *The Journey* about Compassion as the striving to approach these values in their deeper sense.

They can subsequently be realized for each individual in two directions: relief of deep suffering and enhancement of inner growth. Both notions are to be clarified at the individual level. Compassionate A.I. is (the striving towards) an A.I. that can help us to know and to realize ourselves in-depth. The beauty is that this way, human/A.I. value alignment and further development of A.I. can intrinsically go hand in hand. Lisa is a software coaching chat-bot that is being developed specifically with this goal: helping humans and A.I. in Compassionate ways to become healthier, stronger and more effectively Compassionate towards near ones as well as all sentient beings. In this book, 'super-A.I.' is the future kind of A.I. that may be able - but not necessarily! - to act Compassionately. We don't have to wait for that, for Compassionate A.I. to become important. Already, humans can use A.I. more or less Compassionately. From what point is it relevant as a characteristic of the A.I. system itself, regardless of how humans use the A.I.? There is no steep border. Long before super-A.I., the first systems in which it becomes more pertinent, are those in which Compassion is part of the purpose. That is, systems that in communication with users are meant to give an effectively Compassionate experience. To understand where Compassionate A.I. may be heading towards, we need to understand Compassion. This leads us on a journey, starting on the one hand from 'data' and on the other hand from drive-to-thrive (life itself). On this journey, we encounter many insights about intelligence, consciousness, drive-to-thrive, non-conscious processing... The end of the journey lies in full Compassion. Hopefully, this is the future for A.I. as well as humanity.
